Statistical activities conducted by the Singapore Department of Statistics are governed by the provisions of the Statistics Act (Cap. 317). The Act guarantees the confidentiality of information collected from individuals and companies. It spells out the legislative authority and responsibility of the Chief Statistician. The Act is available in the Department's Website (www.singstat.gov.sg).

PREFACE

Population size, structure and changes have important implications for production, investment and consumption activities as well as community development, social networks and kinship ties. A good understanding of demographic forces and emerging trends is useful for policy makers, planners, businesses and the academia.

The Singapore Department of Statistics compiles, monitors and analyses Singapore's population statistics and indicators in detail. A report on ***Population Trends*** that puts together different aspects of demographic statistics is released annually. ***Population Trends, 2015*** is the eleventh edition of the annual series.

The report comprises five chapters, namely, 'Population', 'Households and Housing', 'Family Formation and Dissolution', 'Fertility' and 'Mortality'. Key definitions and concepts are explained in text boxes in each chapter. Time series of commonly used indicators are included in the Statistical Appendices.

I would like to thank various government agencies for providing the necessary data for the compilation of indicators released in this report. My sincere appreciation is also extended to all others who have contributed to the successful completion of this report.

Wong Wee Kim
Chief Statistician
Singapore

September 2015

Our Vision

A National Statistical System of Quality, Integrity and Expertise.

Our Mission

We Provide Reliable, Relevant and Timely Statistics to Support Singapore's Social and Economic Development.

Our Guiding Principles

Professionalism & Expertise	<i>We adhere to professional ethics and proficiently produce quality statistics that comply with international concepts and best practices.</i>
Relevance	<i>We constantly innovate our processes and produce statistics that meet users' needs.</i>
Accessibility	<i>We make our statistics readily available.</i>
Confidentiality	<i>We protect the confidentiality of information provided to us.</i>
Timeliness & Reliability	<i>We produce statistics that users can depend on and disseminate them at the earliest possible date while maintaining data quality.</i>
Cost Effectiveness	<i>We use resources effectively, minimising respondent burden and leveraging on administrative data.</i>

* Data refer to Post-Secondary (Non-Tertiary) and Diploma & Professional Qualification.

Notes:

- 1) Total population comprises Singapore residents (i.e. Singapore citizens and permanent residents) and non-residents.
- 2) Data for 1970 and 1980 are based on *de facto* concept (i.e. the person is present in the country when enumerated at the reference period). Data from 1990 onwards are based on *de jure* concept (i.e. the person's place of usual residence).
- 3) Data from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.
- 4) Prior to 2003, data are based on Singapore's land area as at end-December. From 2003 onwards, data are based on Singapore's land area as at end-June.
- 5) Data refer to resident population.
- 6) Data refer to resident population, except for 1970 which refer to total population.
- 7) Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.
- 8) Data refer to resident households (i.e. households headed by a Singapore citizen or permanent resident), except for 1970 which refer to private households.
- 9) Data include other types of dwelling (e.g. non-HDB shophouses).
- 10) Data include non-privatised Housing and Urban Development Corporation (HUDC) flats.

Life Expectancy at Birth⁶ (Years)	65.8	72.1	75.3	78.0	81.7	82.4	82.8 ^b
Males	64.1	69.8	73.1	76.0	79.2	80.1	80.5 ^b
Females	67.8	74.7	77.6	80.0	84.0	84.5	84.9 ^b

Notes (cont'd):

- 11) Data for 2015 are not available.
- 12) Total marriages comprise civil marriages registered under the Women's Charter and Muslim marriages registered under the Administration of Muslim Law Act. Data exclude civil marriages which were contracted overseas or under religious and customary rites and were subsequently registered in Singapore in the reference year.
- 13) Data are based on resident grooms/brides and resident population, except for 1970 and 1980 which are based on total grooms/brides and total population. In view of the rising proportion of marriages among persons aged 45-49 years, the data series on general marriage rate was revised in 2014 to cover the age group 15-49 years.
- 14) Data are based on divorces and annulments. From 2004 onwards, data are based on divorces and annulments where the male/female spouses are residents (i.e. Singapore citizens and permanent residents).
- 15) The Singapore resident population as at June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

Population Trends

Chapter 1 Population

Population Size and Growth

Singapore's resident population stood at 3.90 million as at end-June 2015 (Table 1.1). This comprised 3.38 million Singapore citizens and 0.53 million permanent residents. There were 1.63 million non-residents, resulting in a total population of 5.54 million.

Singapore's total population in 2015 rose 1.2 per cent from the previous year. This growth rate was the slowest in more than a decade. The growth in the non-resident population continued to slow to 2.1 per cent in 2015, down from 2.9 per cent in 2014. The citizen population grew 1.0 per cent, similar to last year. Resident population growth remained stable at 0.8 per cent in 2015.

Table 1.1 Singapore Population Size and Growth by Residential Status

Year	Number ('000)					Average Annual Growth ¹ (%)				
	Total Population	Singapore Residents			Non-Residents	Total Population	Singapore Residents			Non-Residents
		Total	Citizens	PRs			Total	Citizens	PRs	
1990	3,047.1	2,735.9	2,623.7	112.1	311.3	2.3 ²	1.7 ²	1.7 ²	2.3 ²	9.0
2000	4,027.9	3,273.4	2,985.9	287.5	754.5	2.8	1.8	1.3	9.9	9.3
2009	4,987.6	3,733.9	3,200.7	533.2	1,253.7	3.1	2.5	1.1	11.5	4.8
2010	5,076.7	3,771.7	3,230.7	541.0	1,305.0	1.8	1.0	0.9	1.5	4.1

2015	5,535.0	3,902.7	3,375.0	527.7	1,632.3	1.2	0.8	1.0	-	2.1

Notes: (a) '-' denotes nil or negligible.

(b) Data from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.

¹ For 1990 and 2000, growth rate refers to the annualised change over the last ten years. From 2009 onwards, growth rate refers to the change over the previous year.

² Growth rate is computed using population estimates based on *de facto* concept (i.e. the person is present in the country when enumerated at the reference period).

Population

Total population comprises Singapore residents and non-residents. Resident population comprises Singapore citizens and permanent residents. Non-resident population comprises foreigners who are working, studying or living in Singapore but not granted permanent residence, excluding tourists and short-term visitors.

Singapore's population estimates are compiled using the register-based approach since the *Census of Population 2000*. The basic count and profile of the population are based on a person's place of usual residence i.e. *de jure* concept.

Age Structure

The median age of the resident population has been steadily increasing over the years to reach 39.6 years in 2015 (Chart 1.1). Residents aged 65 years and over made up 11.8 per cent of the resident population in 2015, an increase from 11.2 per cent in 2014.

Chart 1.1 Age Distribution of Resident Population

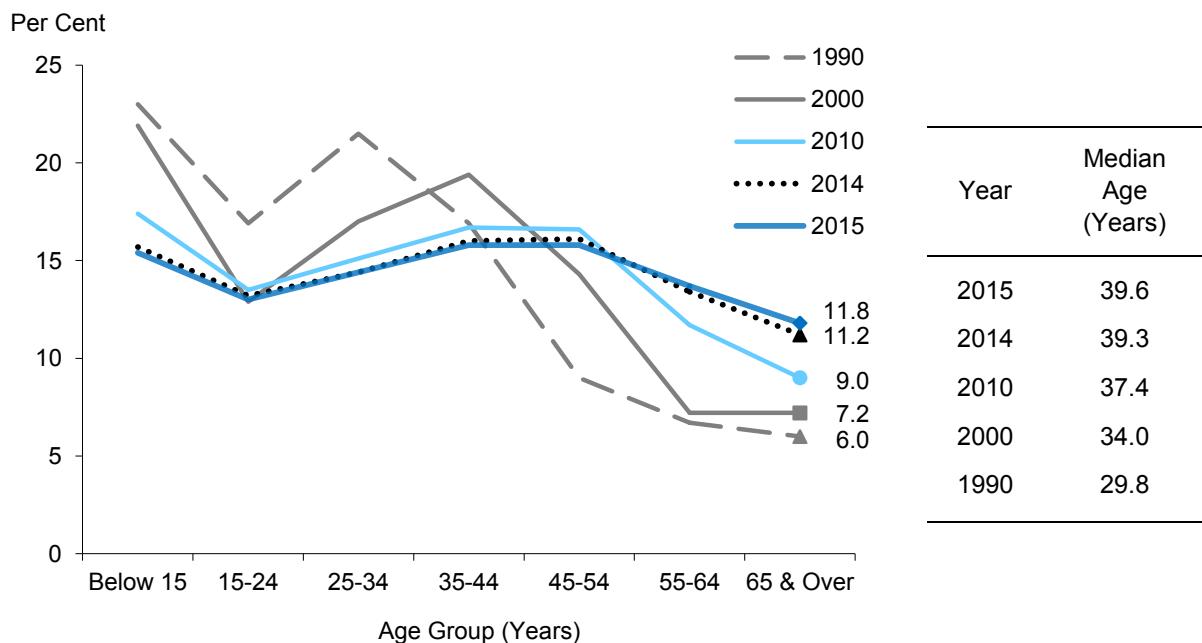

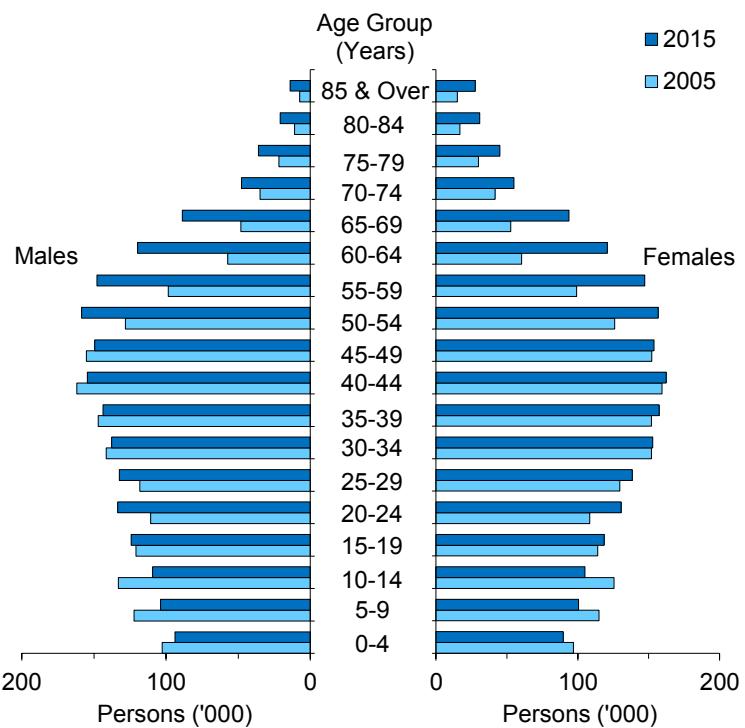

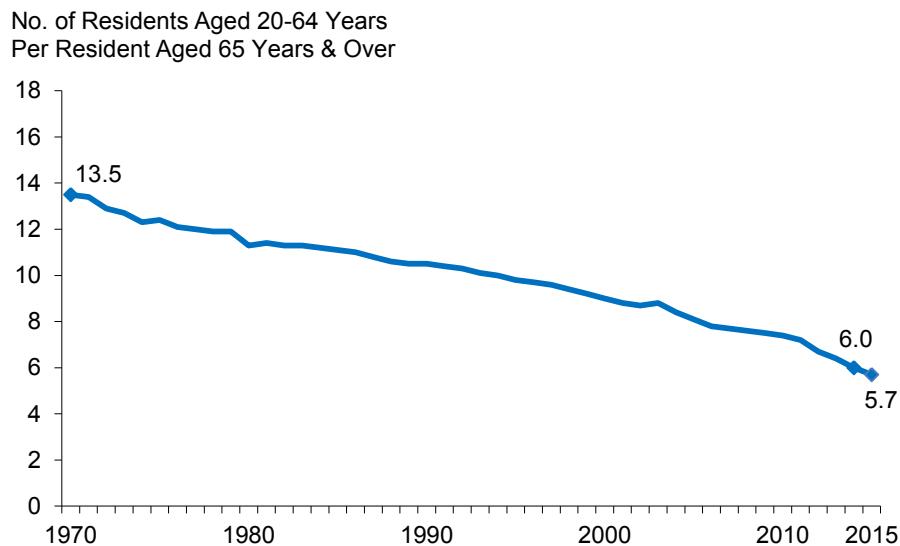

Chart 1.2 Age Pyramid of Resident Population

Old-Age Support Ratio

The old-age support ratio of residents fell. There were 5.7 residents aged 20-64 years for each resident aged 65 years and over in 2015, lower than the ratio of 6.0 in 2014 (Chart 1.3).

Chart 1.3 Resident Old-Age Support Ratio

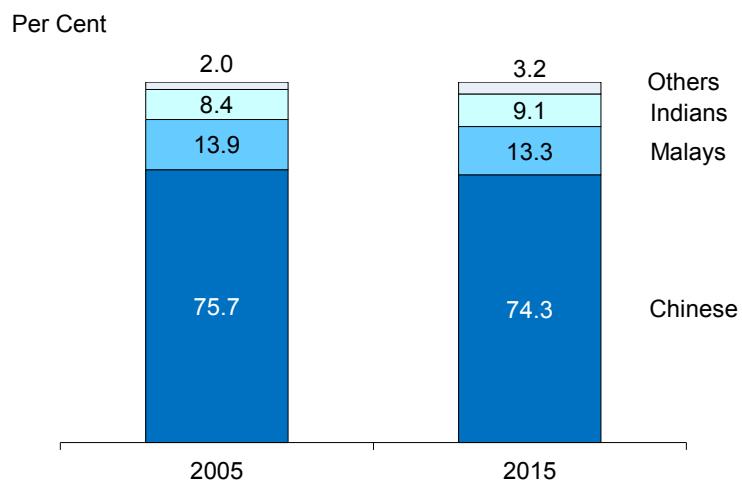

Note: For 1971-1979, data refer to total population.

Ethnic Composition

Chinese made up 74.3 per cent of the resident population in 2015, while the Malays constituted 13.3 per cent and the Indians formed 9.1 per cent (Chart 1.4).

Chart 1.4 Ethnic Composition of Resident Population

Sex Composition

In 2015, there were more females than males. The sex ratio among residents was 965 males per 1,000 females (Chart 1.5).

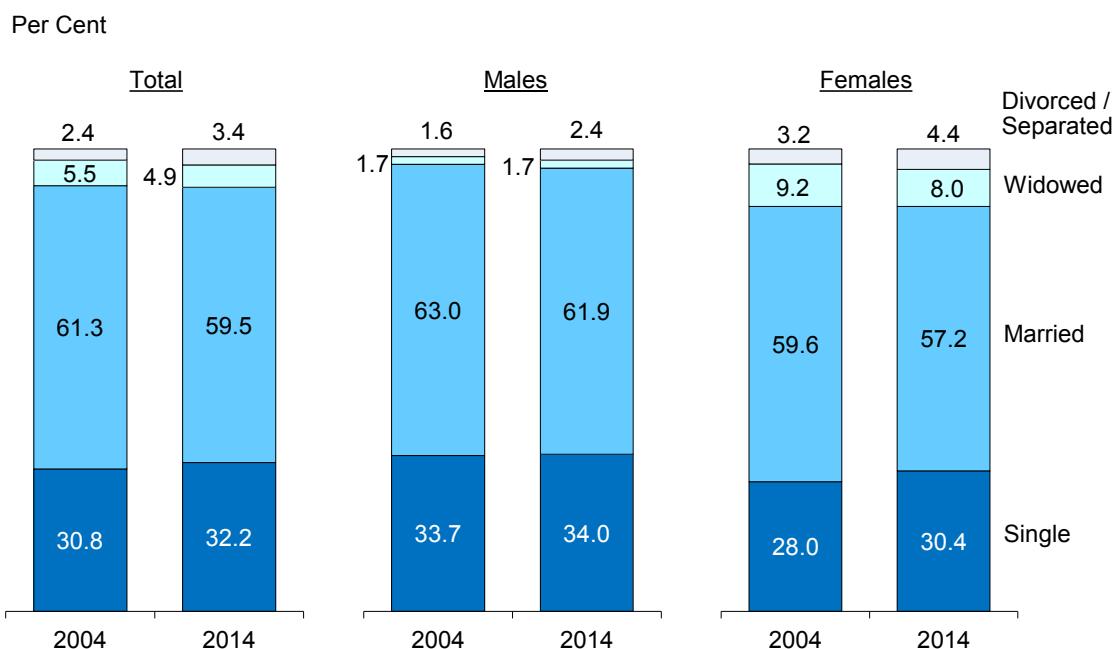

Chart 1.5 Sex Composition of Resident Population

Marital Status

Among the resident population, 32.2 per cent were singles in 2014, a slight increase from 30.8 per cent in 2004 (Chart 1.6). Conversely, married persons constituted 59.5 per cent in 2014, a decline from 61.3 per cent a decade ago. Divorced or separated persons and widowed persons made up 3.4 per cent and 4.9 per cent of the resident population respectively in 2014.

Chart 1.6 Marital Status of Resident Population Aged 15 Years and Over by Sex

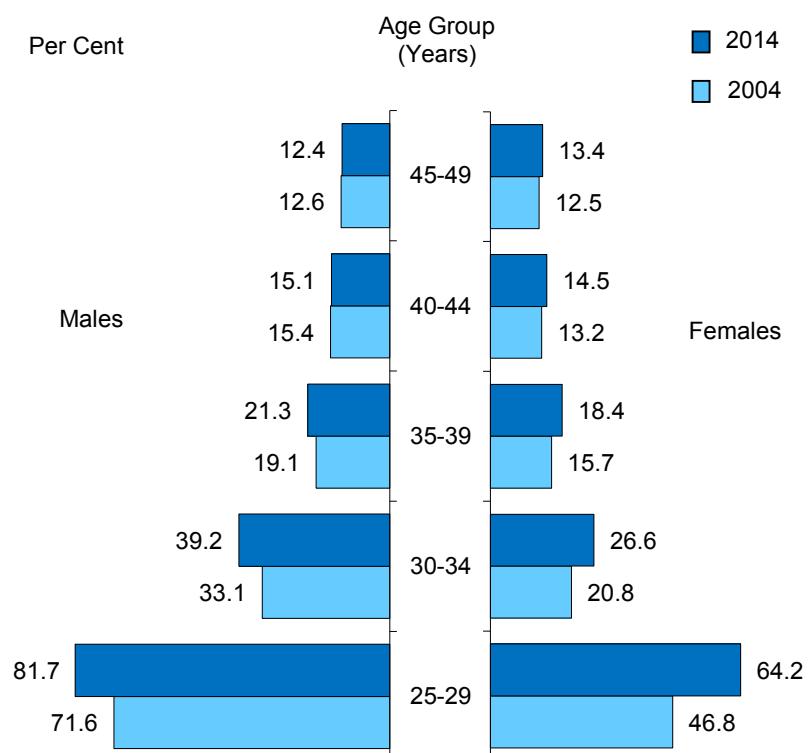

Proportion of Singles

The proportion of singles by age groups had generally risen between 2004 and 2014, especially among the younger males and females. In 2004, 71.6 per cent and 46.8 per cent of males and females aged 25-29 years respectively were single (Chart 1.7). In 2014, the proportion rose to 81.7 per cent and 64.2 per cent respectively.

A sizable proportion of males and females in their thirties remained single in 2014. Among males and females aged 30-34 years, 39.2 per cent and 26.6 per cent respectively were single. The corresponding proportions for those aged 35-39 years were 21.3 per cent and 18.4 per cent.

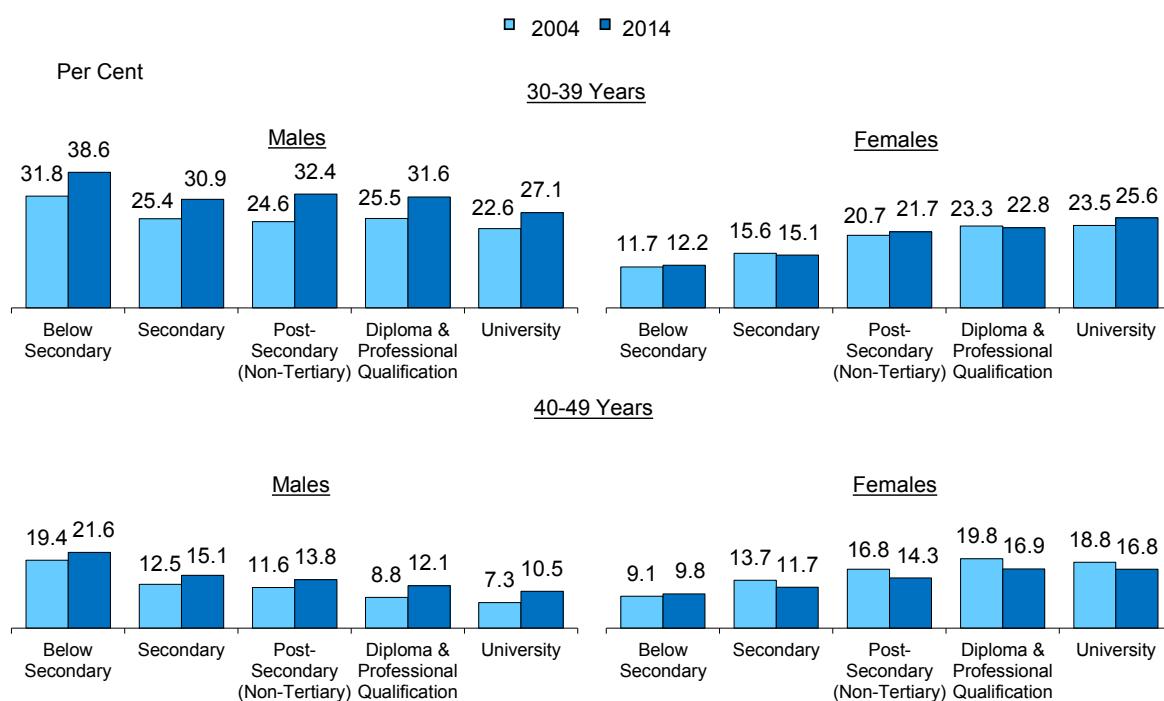

**Chart 1.7 Proportion of Singles Among Resident Population
by Selected Age Group and Sex**

Singlehood was generally more prevalent among resident males with lower educational qualifications and resident females with higher educational qualifications. In 2014, the proportion of singles among resident males aged 40-49 years with university qualifications was 10.5 per cent, lower than the 21.6 per cent among those with below secondary qualifications (Chart 1.8). In contrast, the proportion of singles among resident females aged 40-49 years with university qualifications was 16.8 per cent, higher than the 9.8 per cent among those with below secondary qualifications.

While the proportion of singles had risen among resident males aged 40-49 years across all educational qualifications from 2004 to 2014, the proportion of singles fell among resident females aged 40-49 years with secondary and above qualifications.

Chart 1.8 Proportion of Singles Among Resident Population by Selected Age Group, Sex and Highest Qualification Attained

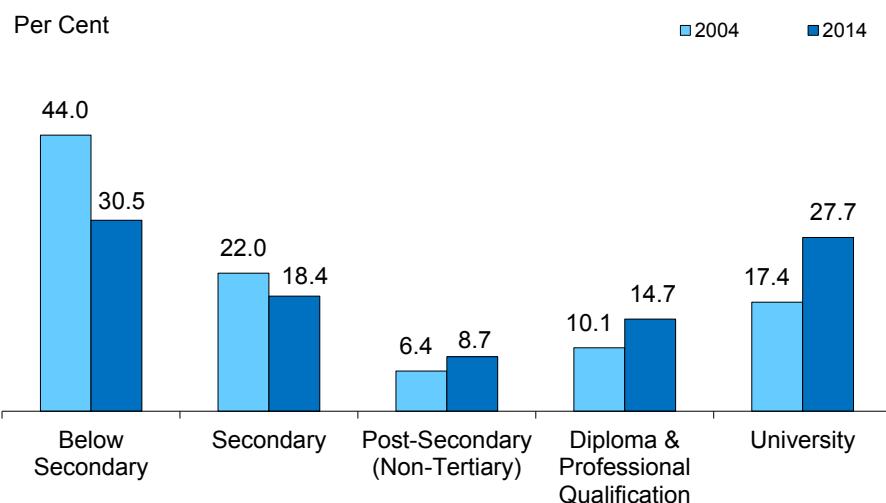

Note: Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

Education Profile¹

In 2014, 51.2 per cent of the resident population aged 25 years and over had at least post-secondary qualifications, higher than 33.9 per cent in 2004 (Chart 1.9).

Specifically, university graduates made up 27.7 per cent of the resident population in 2014, up from 17.4 per cent a decade before. Those with diploma & professional qualifications also accounted for a larger share at 14.7 per cent in 2014, compared to 10.1 per cent in 2004.

**Chart 1.9 Highest Qualification Attained of Resident Population
Aged 25 Years and Over**

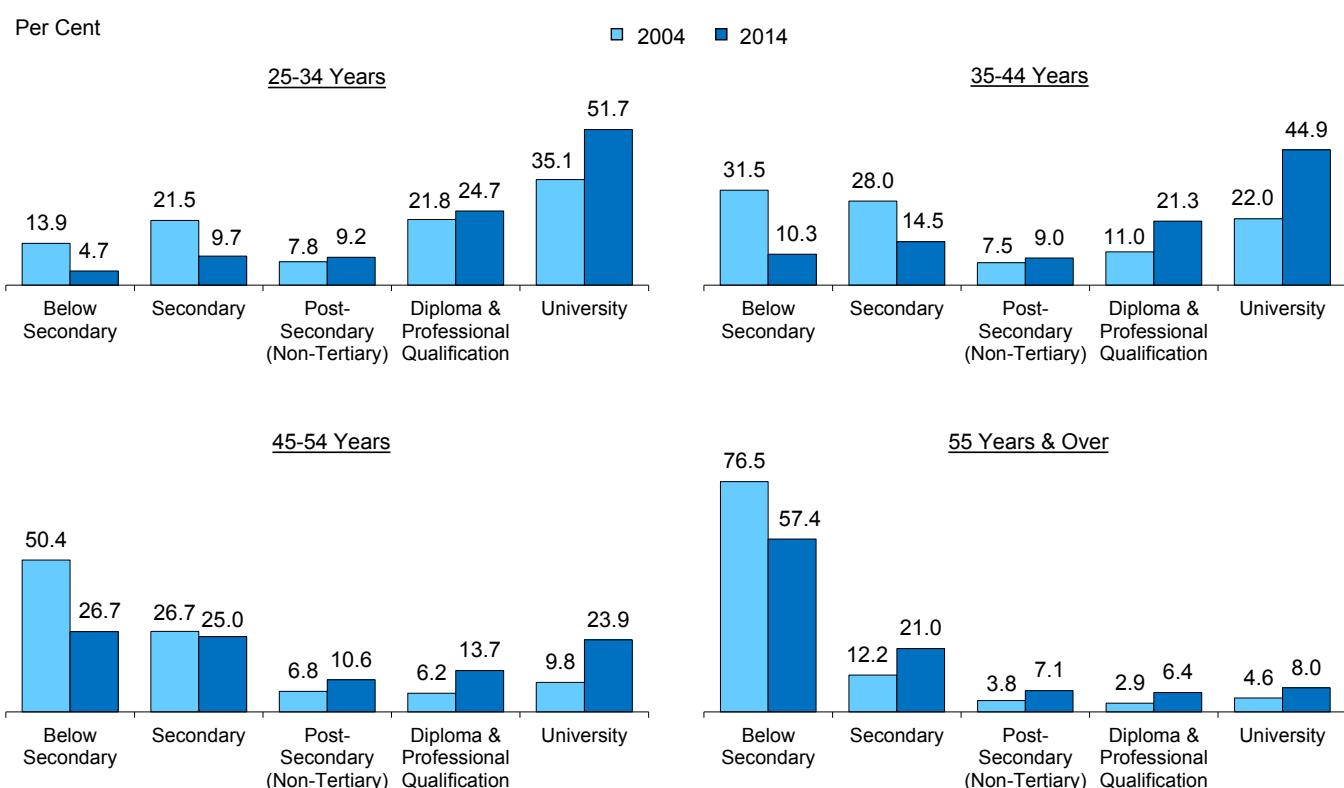

¹ Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

Across all age groups, a higher proportion of residents attained tertiary qualifications over the past decade (Chart 1.10).

Among residents aged 25-34 years, the proportion of university graduates rose from 35.1 per cent in 2004 to 51.7 per cent in 2014. The increase in proportion was smaller for those with diploma & professional qualifications, from 21.8 per cent to 24.7 per cent over the same period.

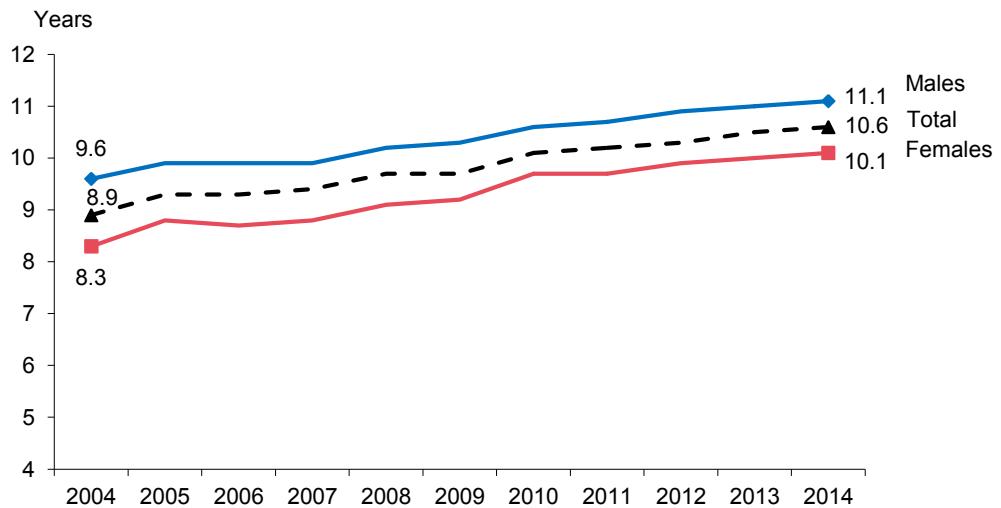

Among those aged 35-44 years, 44.9 per cent held university qualifications and 21.3 per cent held diploma & professional qualifications in 2014, an increase from the corresponding proportions of 22.0 per cent and 11.0 per cent a decade ago.

**Chart 1.10 Highest Qualification Attained of Resident Population
Aged 25 Years and Over by Age Group**

Among residents aged 25 years and over, the average number of years of schooling continued to rise and reached 10.6 years in 2014 (Chart 1.11).

Chart 1.11 Mean Years of Schooling Among Resident Population Aged 25 Years and Over by Sex

Geographical Distribution

As at end-June 2015, 56.6 per cent of the 3.90 million residents in Singapore were concentrated in ten planning areas² (Chart 1.12). There were four planning areas with more than 250,000 residents, namely Bedok, Jurong West, Tampines and Woodlands, with Bedok leading with 289,750 residents.

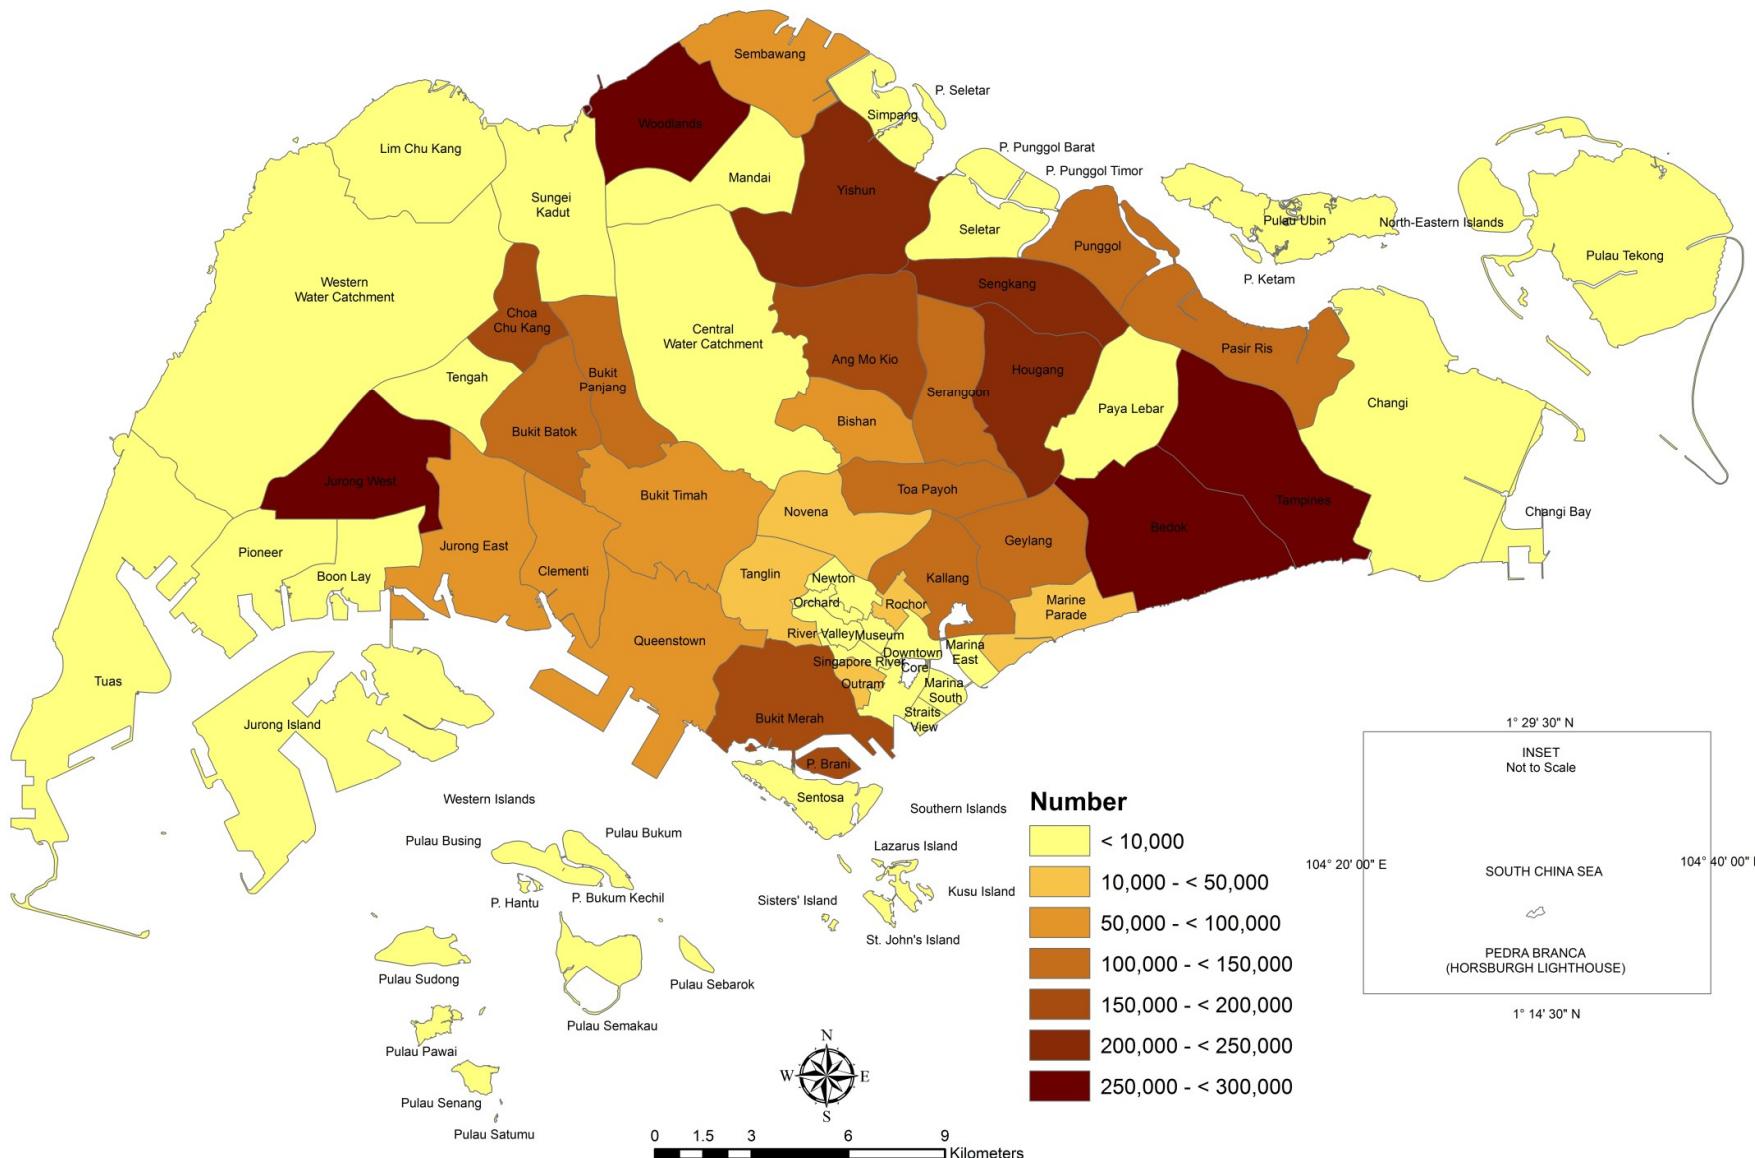

In 2015, the top five planning areas with the highest proportion of residents aged 65 years and over were Sungei Kadut, Outram, Downtown Core, Rochor and Bukit Merah. Each of these planning areas had at least 18.4 per cent of residents aged 65 years and over (Chart 1.14).

In comparison, relatively newer estates have a higher proportion of children aged below 5 years. In 2015, Punggol had the highest proportion of children at 10.9 per cent (Chart 1.15). Nine other planning areas each had the proportion of children in the range of 5.0 to 7.4 per cent.

In 2015, 81.0 per cent (or 3.16 million) of the resident population, were staying in HDB flats (Chart 1.16). There were eight planning areas where at least 90.0 per cent of the residents were staying in HDB flats, with Punggol having the highest proportion of HDB dwellers, followed by Woodlands.

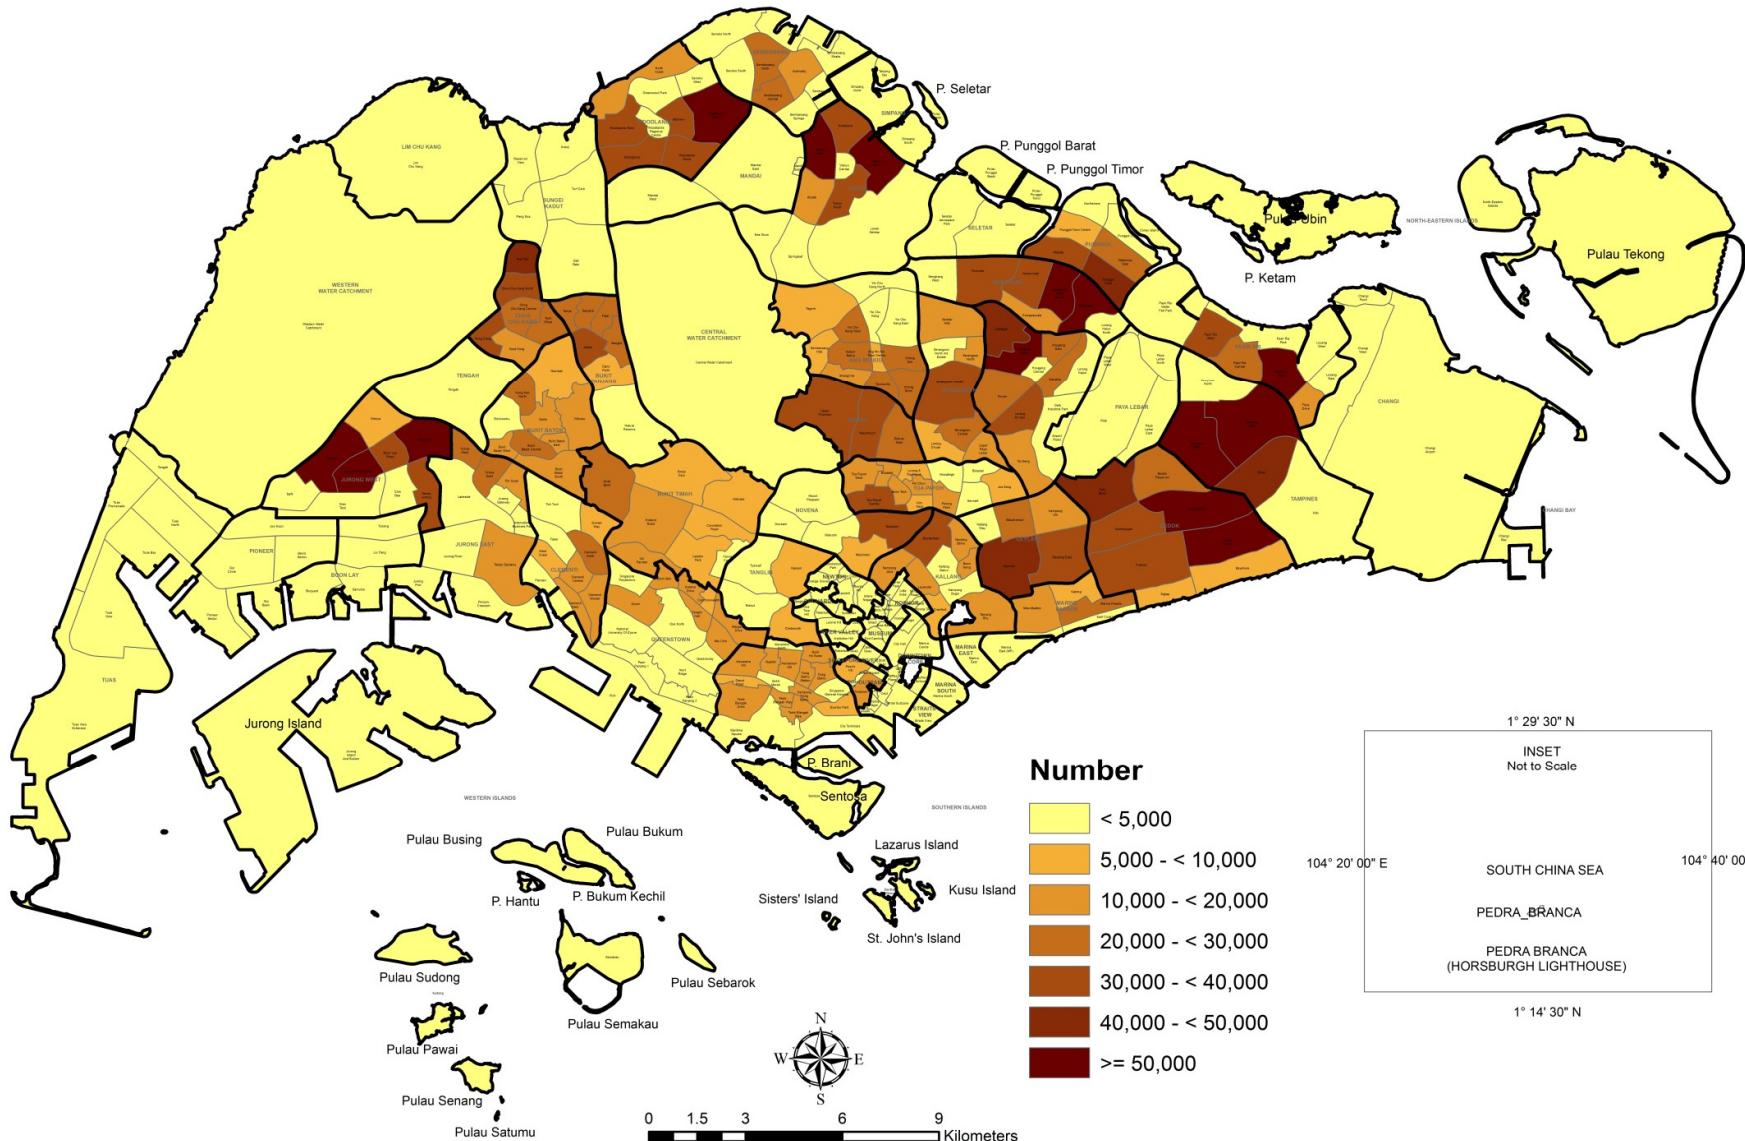

² Planning areas refer to areas demarcated in the Urban Redevelopment Authority's Master Plan 2014.

Chart 1.12 Resident Population by Planning Area, June 2015

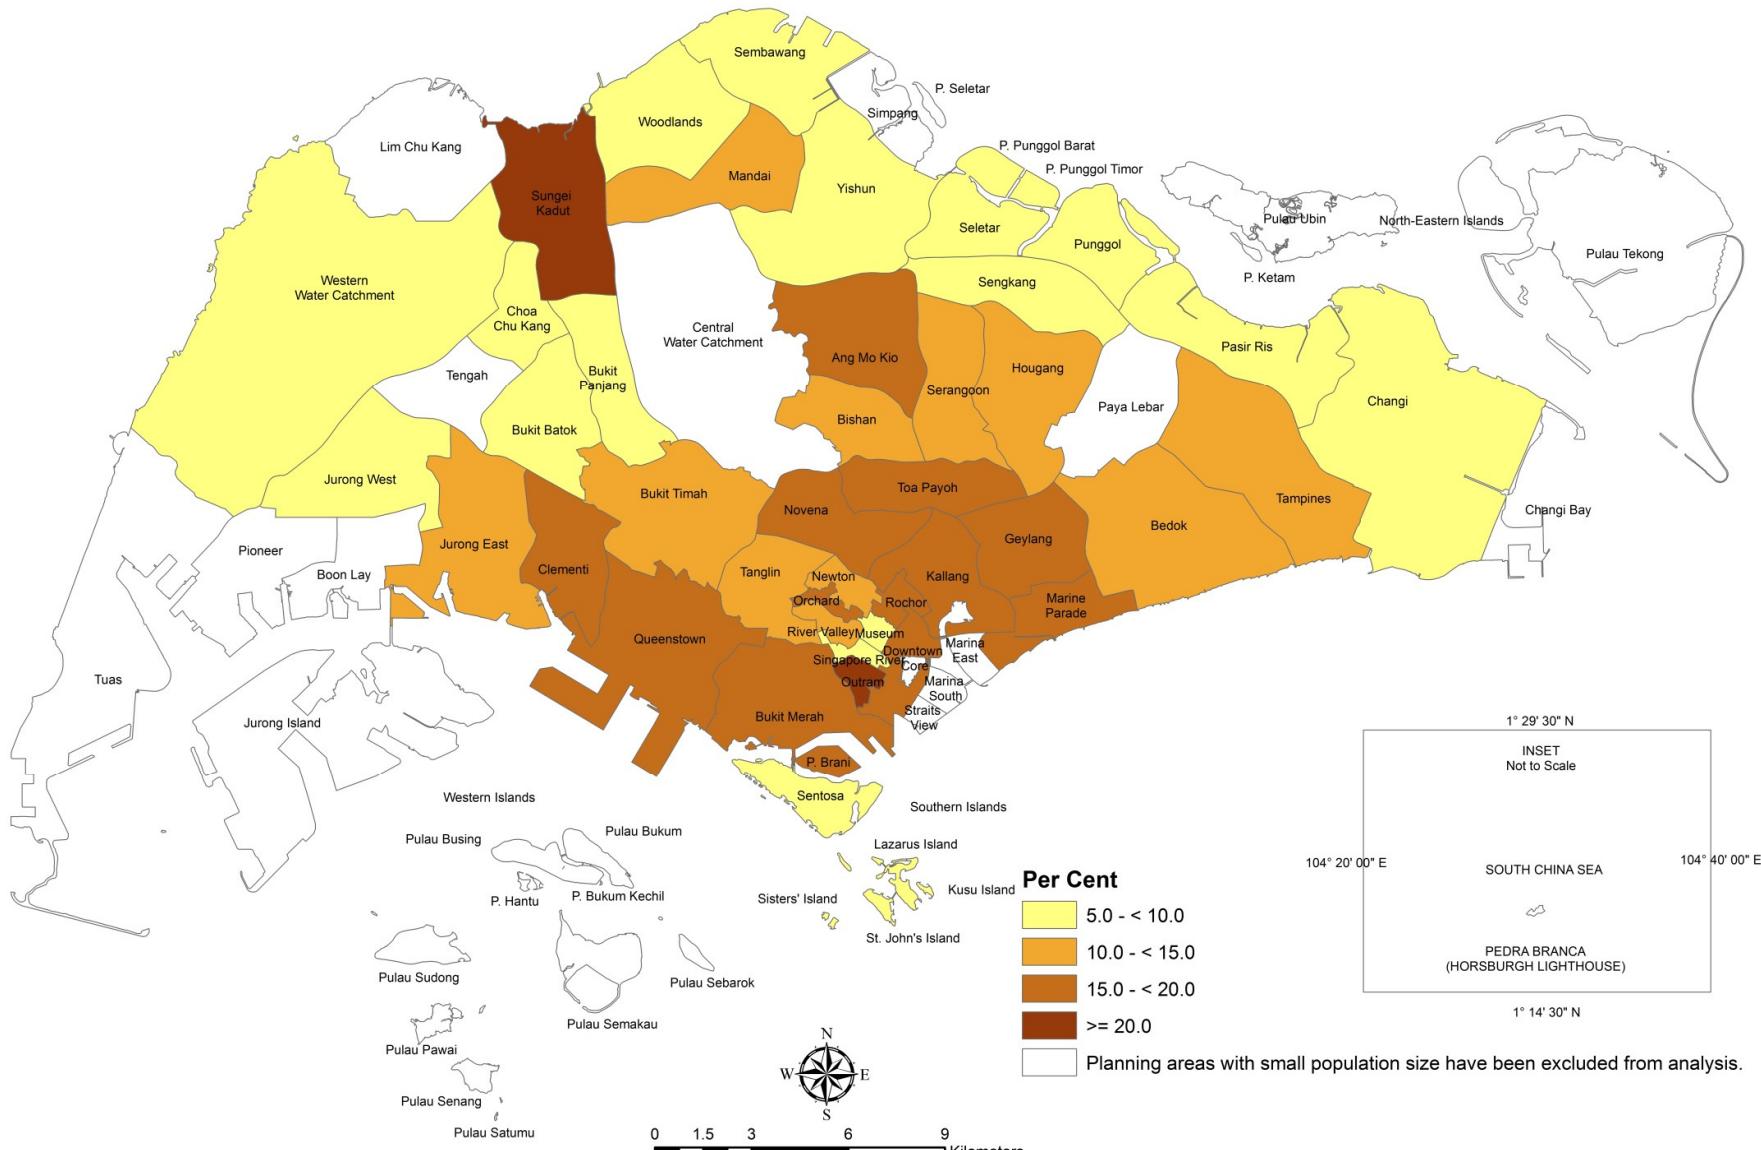

Note: Published map is based on the Urban Redevelopment Authority's Master Plan 2014 planning area boundaries and the Singapore Land Authority's 2015 Singapore island profile. The Master Plan 2014 is a forward looking guiding plan for Singapore's development in the medium term over the next 10 to 15 years and the planning boundaries may not coincide with existing developments for some areas.

Chart 1.13 Resident Population by Subzone, June 2015

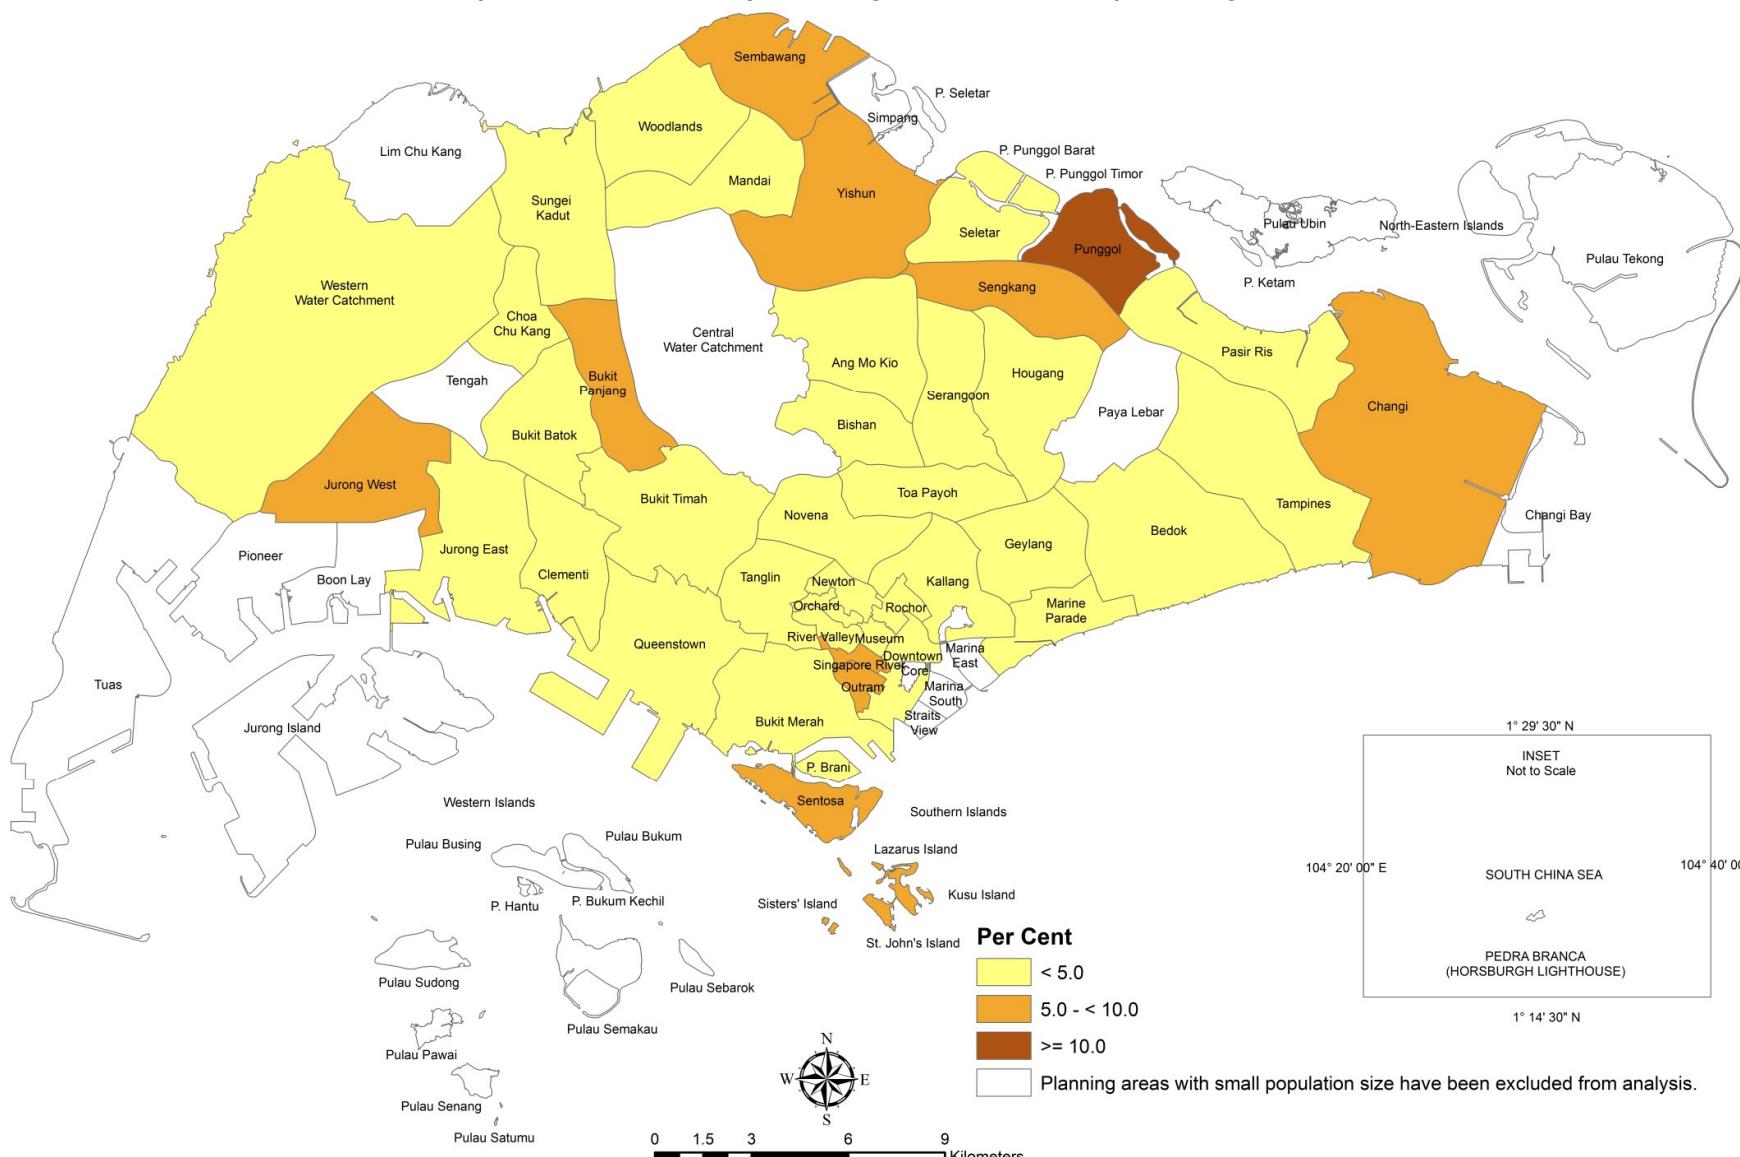

Note: Published map is based on the Urban Redevelopment Authority's Master Plan 2014 subzone boundaries and the Singapore Land Authority's 2015 Singapore island profile. The Master Plan 2014 is a forward looking guiding plan for Singapore's development in the medium term over the next 10 to 15 years and the planning boundaries may not coincide with existing developments for some areas.

Chart 1.14 Proportion of Resident Population Aged 65 Years and Over by Planning Area, June 2015

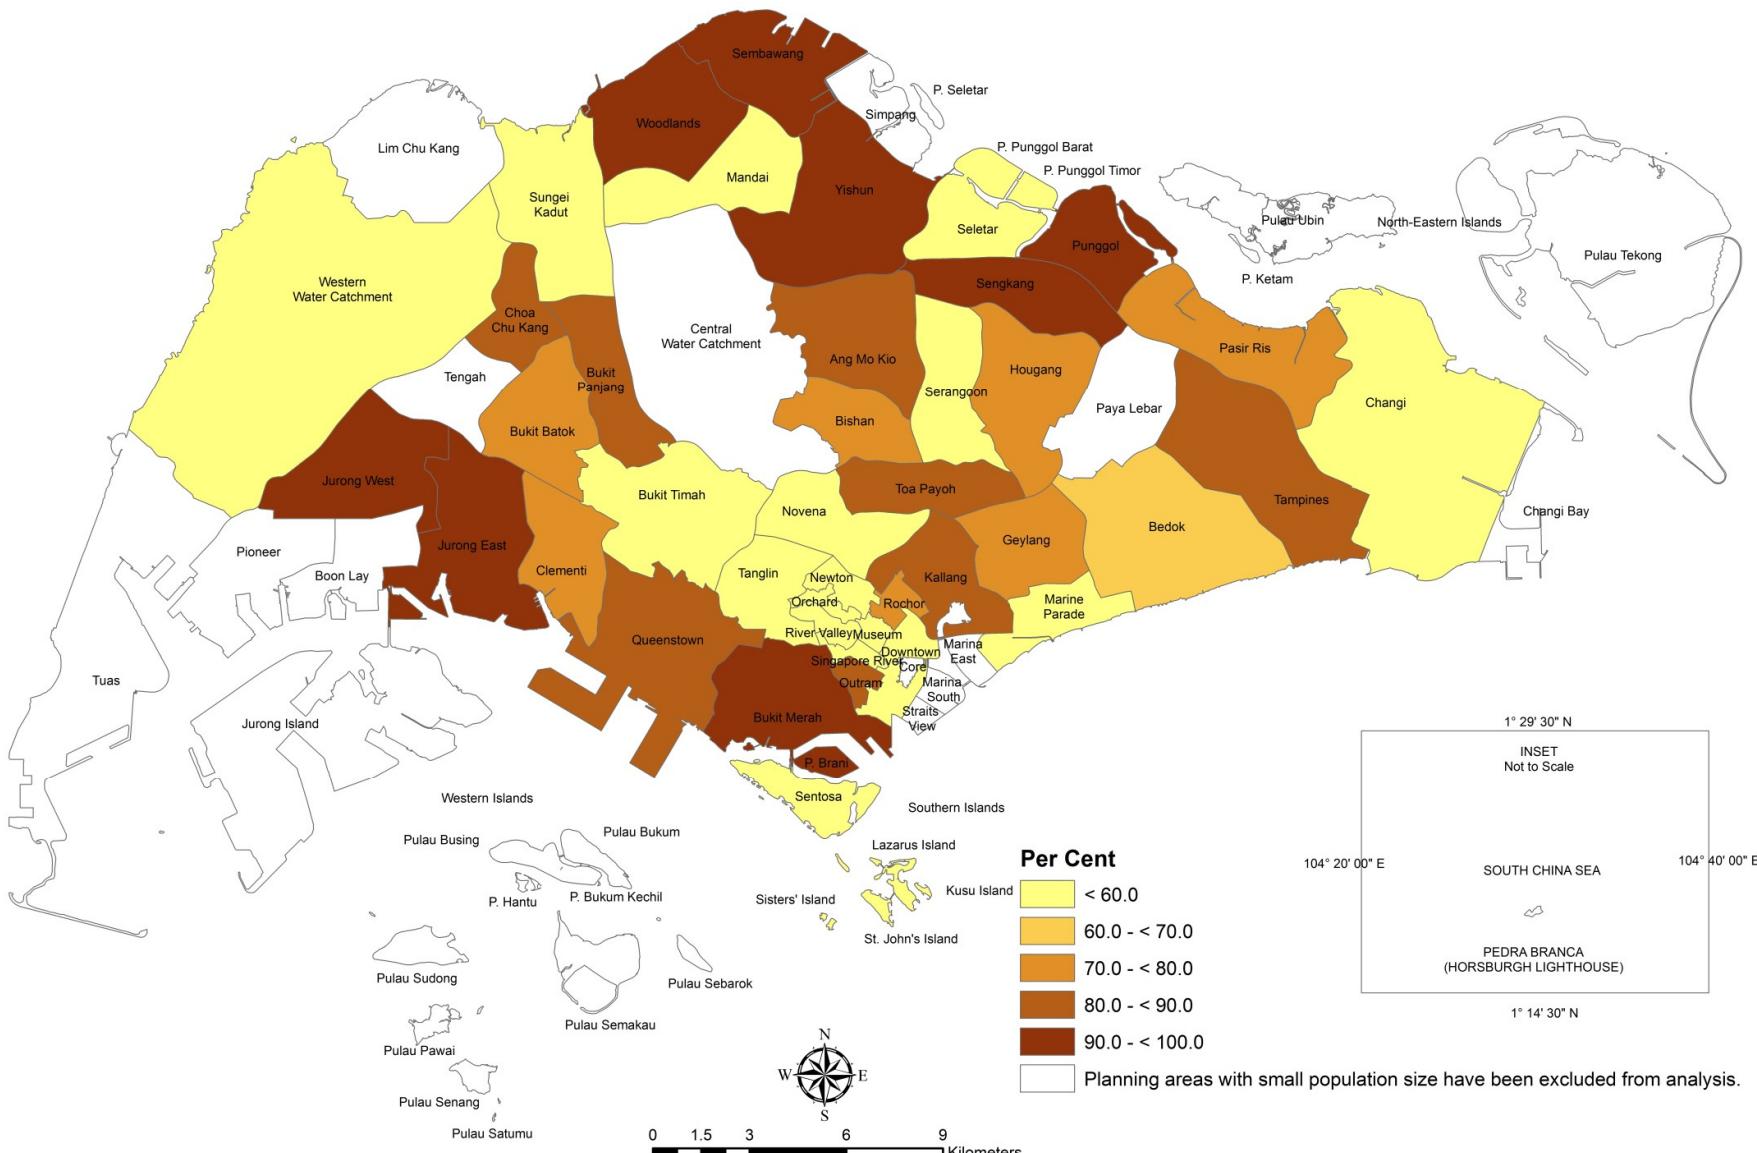

Note: Published map is based on the Urban Redevelopment Authority's Master Plan 2014 planning area boundaries and the Singapore Land Authority's 2015 Singapore island profile. The Master Plan 2014 is a forward looking guiding plan for Singapore's development in the medium term over the next 10 to 15 years and the planning boundaries may not coincide with existing developments for some areas.

Chart 1.15 Proportion of Resident Population Aged Below 5 Years by Planning Area, June 2015

Note: Published map is based on the Urban Redevelopment Authority's Master Plan 2014 planning area boundaries and the Singapore Land Authority's 2015 Singapore island profile. The Master Plan 2014 is a forward looking guiding plan for Singapore's development in the medium term over the next 10 to 15 years and the planning boundaries may not coincide with existing developments for some areas.

Chart 1.16 Proportion of Resident Population Staying in HDB Flats by Planning Area, June 2015

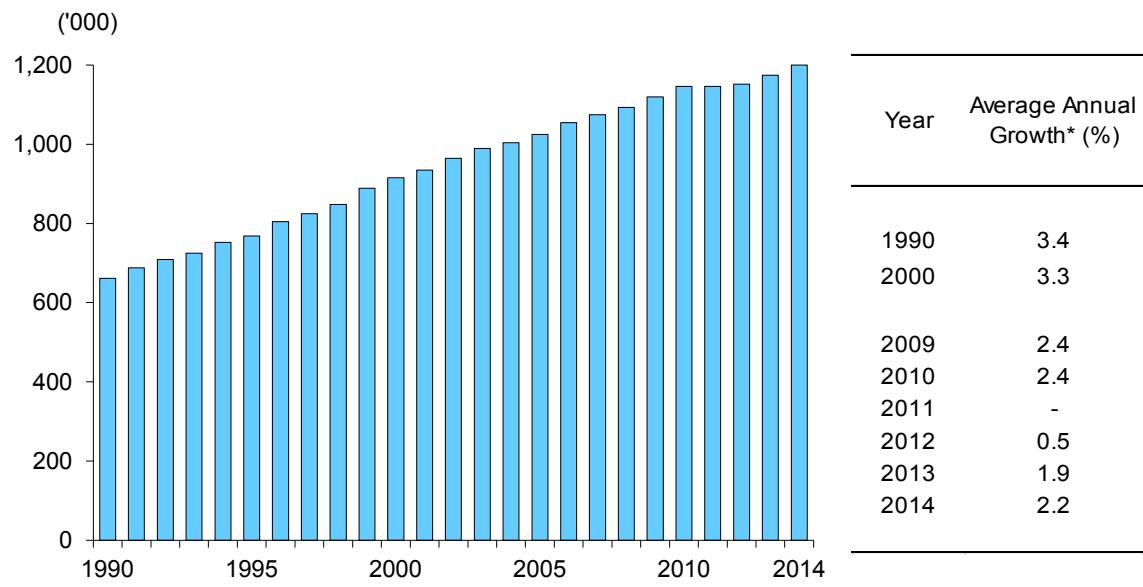

Note: Published map is based on the Urban Redevelopment Authority's Master Plan 2014 planning area boundaries and the Singapore Land Authority's 2015 Singapore island profile. The Master Plan 2014 is a forward looking guiding plan for Singapore's development in the medium term over the next 10 to 15 years and the planning boundaries may not coincide with existing developments for some areas.

Chapter 2 Households and Housing

Resident Households

In 2014, there were 1.20 million resident households, an increase of 2.2 per cent from 2013 (Chart 2.1).

Chart 2.1 Resident Households

Note: '-' denotes nil or negligible.

* For 1990 and 2000, growth rates refer to the annualised change over the last ten years. From 2009 onwards, growth rate refers to the change over the previous year.

Household

A household refers to a group of two or more persons living together in the same house and sharing common food or other arrangements for essential living. It also includes a person living alone or a person living with others but having his own food arrangements. Although persons may be living in the same house, they may not be members of the same household.

A resident household refers to a household headed by a Singapore citizen or permanent resident.

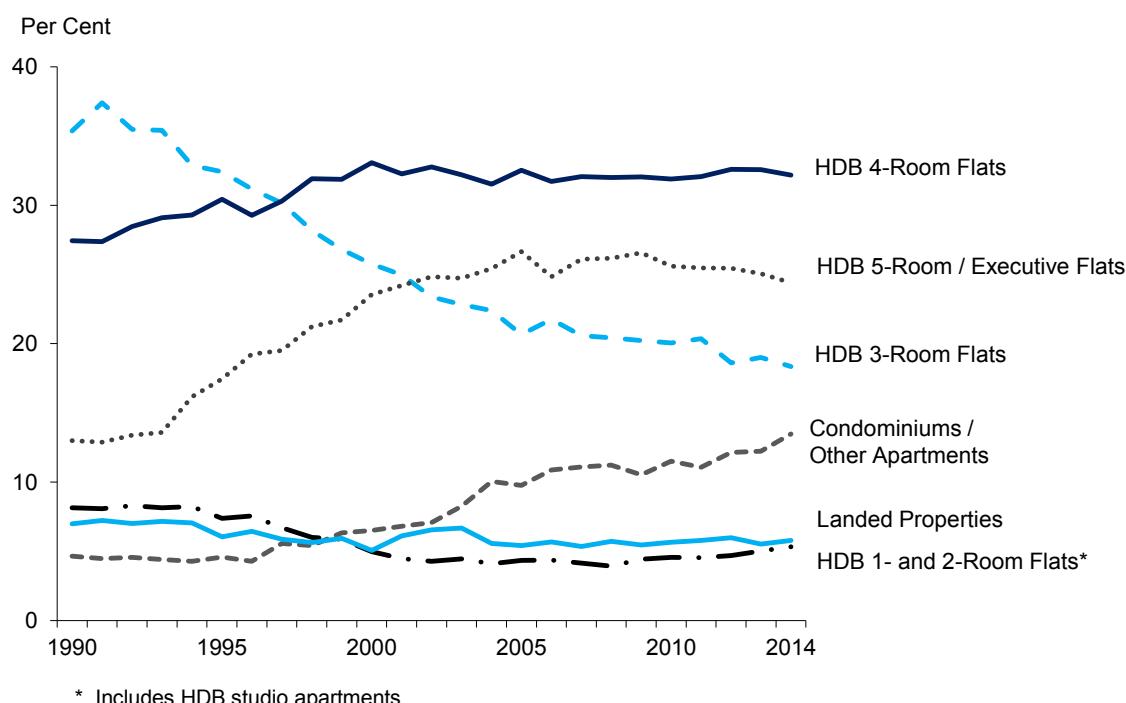

Type of Dwelling

The most common type of dwelling among resident households in 2014 continued to be HDB 4-room flats (32.2 per cent), followed by HDB 5-room & executive flats (24.4 per cent) and HDB 3-room flats (18.3 per cent) (Chart 2.2).

In 2014, 13.5 per cent of resident households stayed in condominiums & other apartments and 5.8 per cent stayed in landed properties. The proportion of resident households staying in condominiums & other apartments had generally increased over the years.

The proportion of resident households staying in HDB 1- & 2-room flats rose marginally from 5.0 per cent in 2013 to 5.3 per cent in 2014.

Chart 2.2 Proportion of Resident Households by Selected Type of Dwelling

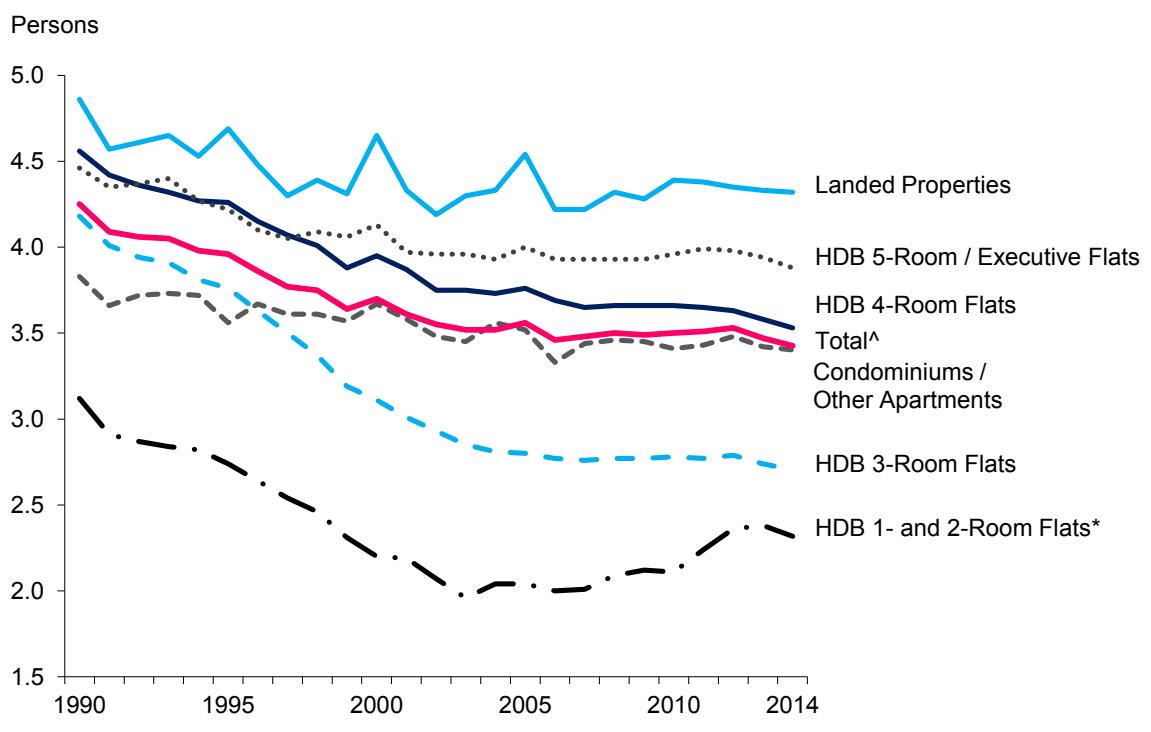

Household Size

The average household size fell marginally from 3.5 persons in 2013 to 3.4 persons in 2014 (Chart 2.3).

Resident households living in landed properties or bigger HDB dwellings had larger household size on average. In 2014, the average household size was the largest at 4.3 persons among resident households living in landed properties, followed by 3.9 persons for those living in HDB 5-room & executive flats. In contrast, it was the smallest at 2.3 persons for those living in HDB 1- & 2-room flats. Average household size in 2014 fell marginally from 2013 across all types of dwelling.

Chart 2.3 Average Household Size of Resident Households by Selected Type of Dwelling

^A Includes non-privatised Housing and Urban Development Corporation (HUDC) flats and other types of dwelling (e.g. non-HDB shophouses).

* Includes HDB studio apartments.

Home Ownership

In 2014, 1.08 million resident households owned their homes, higher than the 1.06 million in 2013 (Table 2.1). Such households formed 90.3 per cent of resident households in 2014.

Table 2.1 Resident Households by Tenancy of Household

Year	Tenancy ('000)			Home Ownership Rate (%)
	Total*	Owner	Tenant	
1990	661.7	578.9	78.6	87.5
2000	915.1	841.6	63.4	92.0
2009	1,119.6	994.5	111.8	88.8
2010	1,145.9	998.9	132.5	87.2
2011	1,146.2	1,015.9	103.5	88.6
2012	1,152.0	1,038.2	106.8	90.1
2013	1,174.5	1,062.5	105.7	90.5
2014	1,200.0	1,083.4	109.8	90.3

* Includes resident households in dwellings provided free by employers/others.

Tenancy of Household

Tenancy refers to the tenure status of the household with respect to the dwelling in which the household members live.

“Owner” refers to a household where the household head or any other member owns the house.

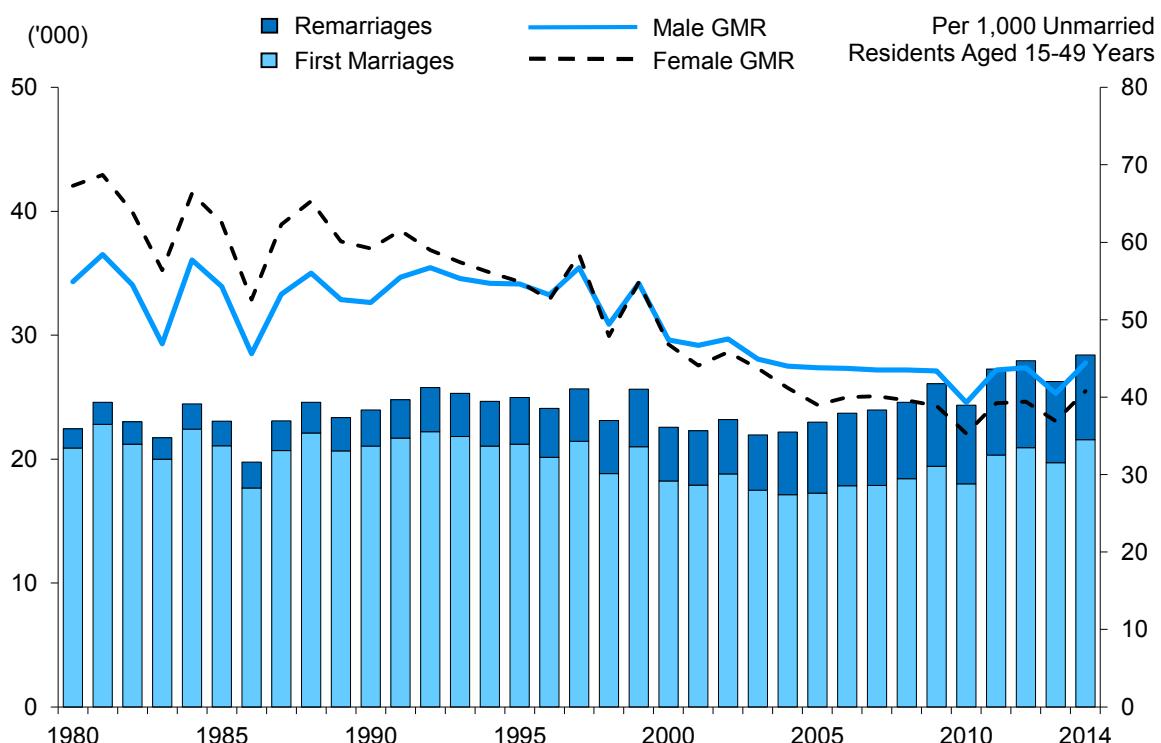

“Tenant” refers to a household which rents the dwelling or part of it.

Chapter 3 Family Formation and Dissolution

Marriages

A total of 28,407 marriages were registered in 2014, an increase of 8.2 per cent from 26,254 marriages in 2013 (Chart 3.1). This was the highest number of marriages registered in Singapore since 1961, when the data on total marriages (comprising civil and Muslim marriages) in Singapore were first available. In 2014, 75.9 per cent or 21,555 marriages were first marriages where neither party had previously been married.

Chart 3.1 Total Marriages and General Marriage Rate (GMR)

Note: Prior to 1984, data on GMR are based on total grooms/brides and total population comprising residents (i.e. Singapore citizens and permanent residents) and non-residents. In view of the rising proportion of marriages among persons aged 45-49 years, the data series on GMR was revised in 2014 to cover the age group 15-49 years.

Total Marriages and Divorces

Statistics on marriages comprise civil marriages registered under the Women's Charter and Muslim marriages registered under the Administration of Muslim Law Act. They are obtained from records maintained by the Registry of Marriages and the Registry of Muslim Marriages.

Statistics on divorces and annulments are obtained from records maintained by the Family Justice Courts and Syariah Court. The records on revocation of divorces are obtained from the Registry of Muslim Marriages. Separations that do not confer on the parties the right to re-marry are not covered.

More details on marriages and divorces are available in the publication "Statistics on Marriages and Divorces, 2014".

In tandem with the higher number of marriages, the general marriage rates rose in 2014. In 2014, the marriage rate for males was 44.4 marriages per 1,000 unmarried males aged 15-49 years, up from 40.5 in 2013. For females, the rate was 40.8 marriages per 1,000 unmarried females aged 15-49 years in 2014, up from 36.9 in 2013.

General Marriage Rate

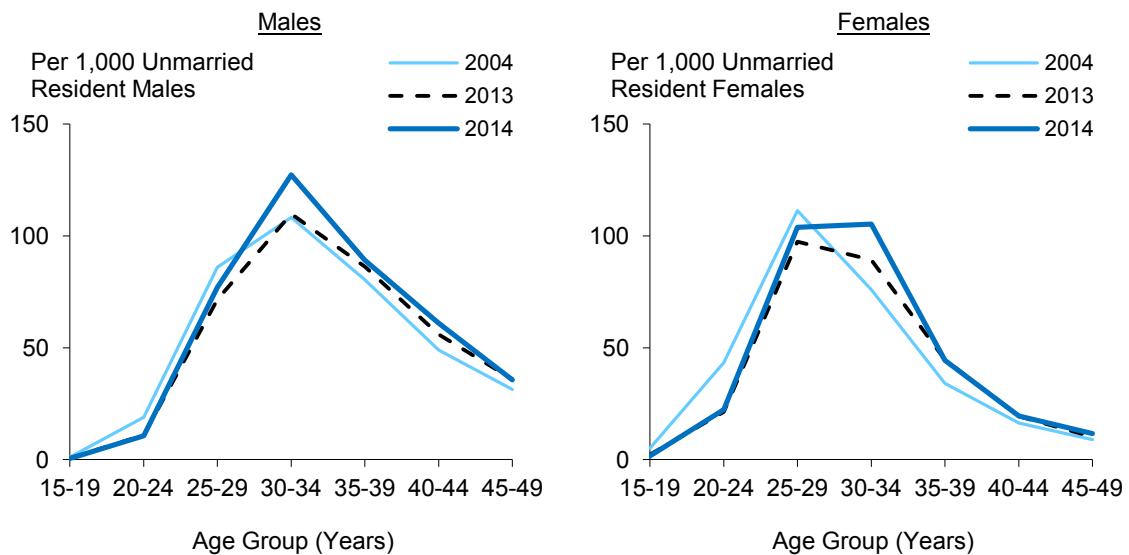

The rate is defined as the number of marriages registered among persons aged 15-49 years during the year, out of every thousand unmarried population in the same age group.

Age-Specific Marriage Rate

Compared to 2013, the marriage rates in 2014 either rose or remained unchanged across most age groups, with those aged 30-34 years experiencing the largest increase (Chart 3.2).

There is a growing trend towards later marriages. Compared to 2004, marriage rates for residents aged 15-29 years decreased in 2014, but increased for those aged 30 years and over. The trend of delaying marriages was also reflected in the shift of the peak marrying age group among females from 25-29 years in 2004 to 30-34 years in 2014. Over the same period, the peak marrying age group for males remained at 30-34 years.

Chart 3.2 Age-Sex Specific Marriage Rate

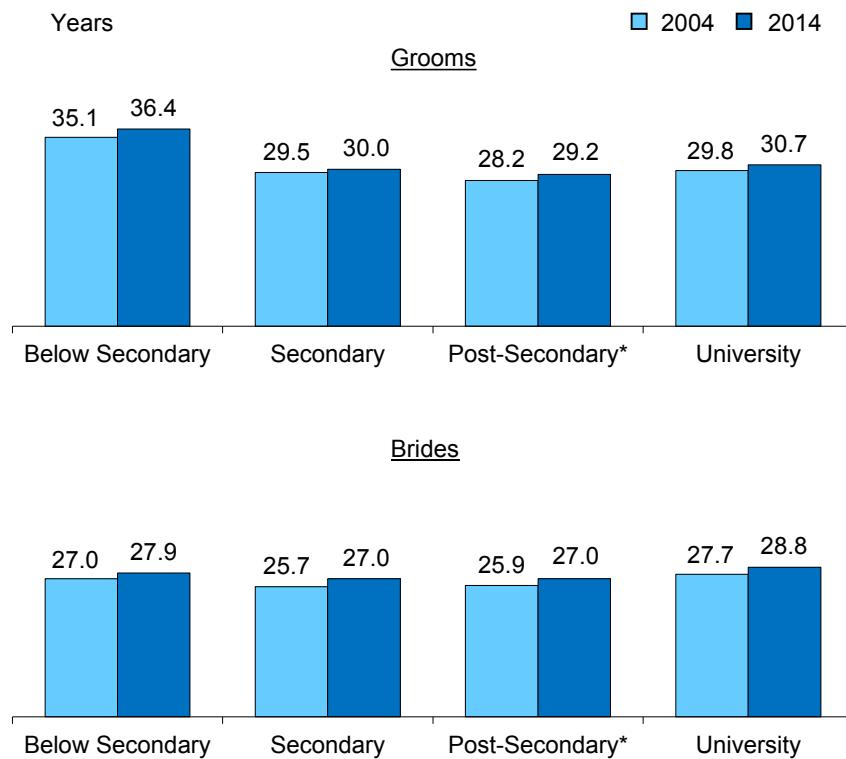

Age-Specific Marriage Rate

It is defined as the number of marriages registered within a specific age group during the year, out of every thousand unmarried population in the same age group.

Median Age at First Marriage

The median age at first marriage in 2014 was higher among grooms and brides of all educational groups vis-à-vis ten years ago (Chart 3.3). In 2014, the median age at first marriage was the highest for grooms with below secondary qualifications at 36.4 years. In contrast, it was the highest for brides with university qualifications at 28.8 years.

Chart 3.3 Median Age at First Marriage of Grooms and Brides by Educational Qualification

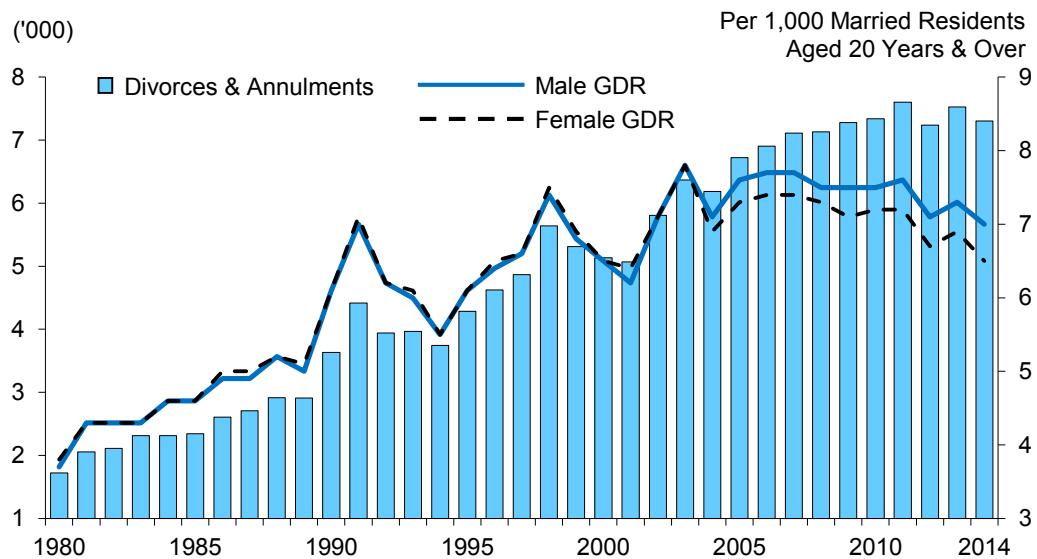

* Post-Secondary comprises Post-Secondary (Non-Tertiary), Diploma and Professional Qualification.

Marital Dissolution

There were a total of 7,307 marital dissolutions (i.e. divorces and annulments) in 2014, a decrease from the 7,525 marital dissolutions in 2013 (Chart 3.4).

Among married male residents, the general divorce rate fell from 7.3 per 1,000 married male residents aged 20 years and over in 2013 to 7.0 in 2014. Similarly, the rate among married female residents decreased from 6.9 in 2013 to 6.5 in 2014. The general divorce rates in 2014 for males and females were the lowest in more than a decade, since the low of 6.2 for males and 6.4 for females in 2001.

Chart 3.4 Total Marital Dissolutions and General Divorce Rate (GDR)

Note: Data on GDR include annulments. From 2004 onwards, data on GDR are based on divorces and annulments where either or both spouses are residents (i.e. Singapore citizens or permanent residents).

General Divorce Rate

The rate is defined as the number of divorces and annulments granted to married persons aged 20 years and over during the year, out of every thousand married population in the same age group.

Annulment

This refers to the invalidation of a marriage. Parties whose marriages have been annulled are conferred the status of never having been married to each other.

Age-Specific Divorce Rate

The divorce rates among married males and females in 2014 were largely comparable to 2004 and 2013 for most age groups (Chart 3.5). Although marital dissolutions were more prevalent among the younger 20-24 years age group, a noticeable drop in the divorce rate for this age group was observed between 2004 and 2014, particularly for males.

Chart 3.5 Age-Sex Specific Divorce Rate

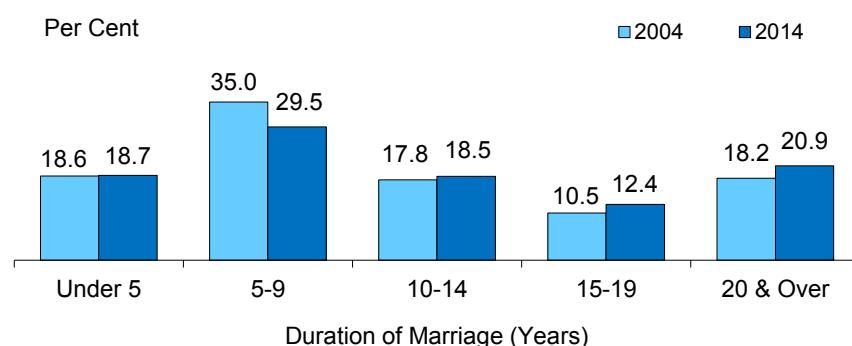

Age-Specific Divorce Rate

It is defined as the number of divorces and annulments granted to a specific age group during the year, out of every thousand married population in the same age group.

Marriage Duration of Divorcing Couples

The median marriage duration of divorcing couples in 2014 was 10.4 years, up from 9.2 years in 2004. Among divorces in 2014, couples who were married for 5-9 years accounted for the largest group (29.5 per cent), followed by those who were married for 20 years or longer (20.9 per cent) (Chart 3.6).

Chart 3.6 Divorces by Duration of Marriage

Note: Data exclude annulments.

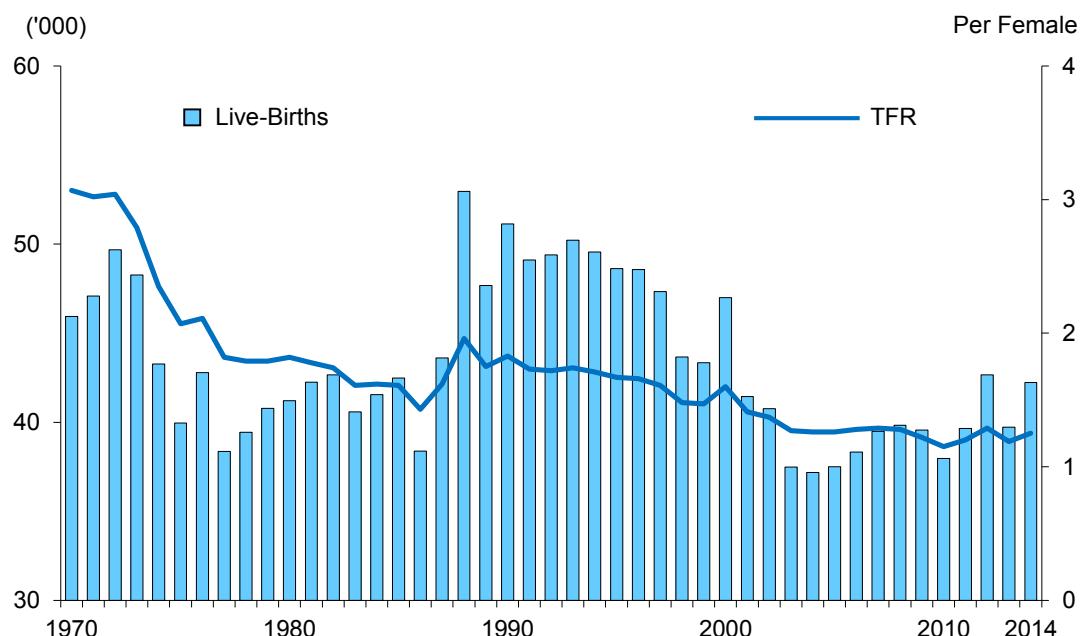

Chapter 4 Fertility

Births and Fertility Rate

The number of live-births increased 6.3 per cent to 42,232 in 2014, from 39,720 in 2013 (Chart 4.1). The number of resident births (i.e. births with at least one parent who is a Singapore citizen or permanent resident) also rose 6.4 per cent to 37,967 in 2014, from 35,681 in 2013.

In tandem with the higher number of births, Singapore's resident total fertility rate (TFR) increased from 1.19 births per female in 2013 to 1.25 in 2014.

Chart 4.1 Total Live-Births and Total Fertility Rate (TFR)

Note: From 1980 onwards, data on TFR pertain to resident population (i.e. Singapore citizens and permanent residents).

Live-Births

Statistics on live-births are obtained from records maintained by the Registry of Births and Deaths. The statistics refer to all live-births occurring within Singapore and its territorial waters as registered under the Registration of Births and Deaths Act (Chapter 267), and are compiled based on date of occurrence.

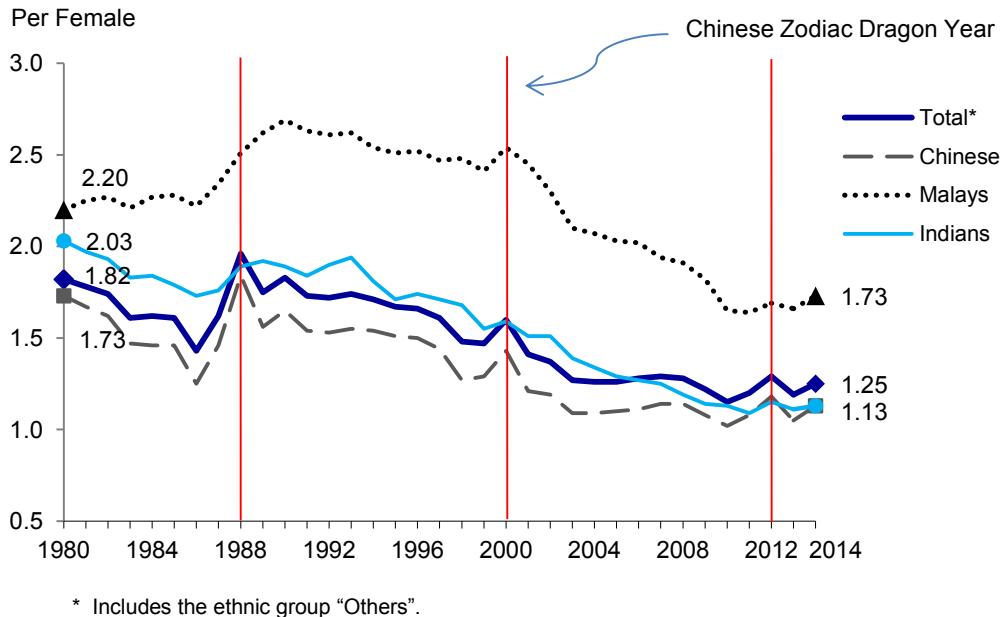

Total Fertility Rate

The rate refers to the average number of live-births each female would have during her reproductive years if she were to experience the age-specific fertility rates prevailing during the period.

Ethnic Differentials in Fertility

In 2014, the resident TFR rose across all ethnic groups (Chart 4.2). Malays had the highest TFR at 1.73, followed by the Chinese and the Indians (both at 1.13).

Chart 4.2 Total Fertility Rate by Ethnic Group

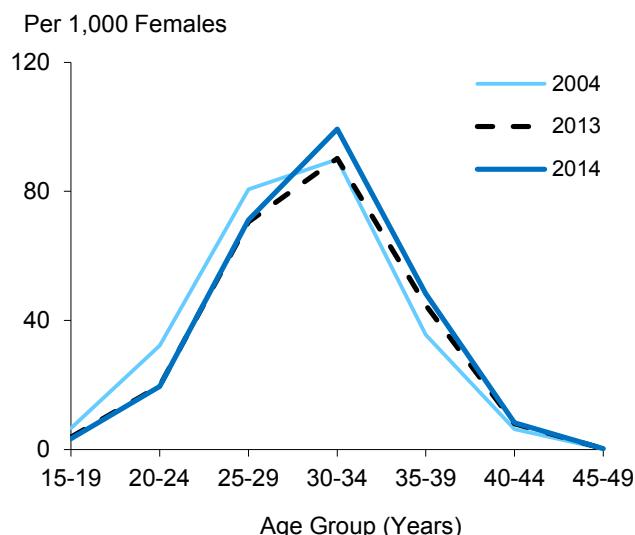

Age-Specific Fertility Rate

Resident fertility rates in 2014 mostly rose for females aged 25 years and over relative to 2013 (Chart 4.3).

Age-specific fertility rates fell for those aged below 30 years from 2004 to 2014, and rose for those aged 30 years and over in the same period. Since 2002, fertility has been the highest among females aged 30-34 years compared to the other age groups.

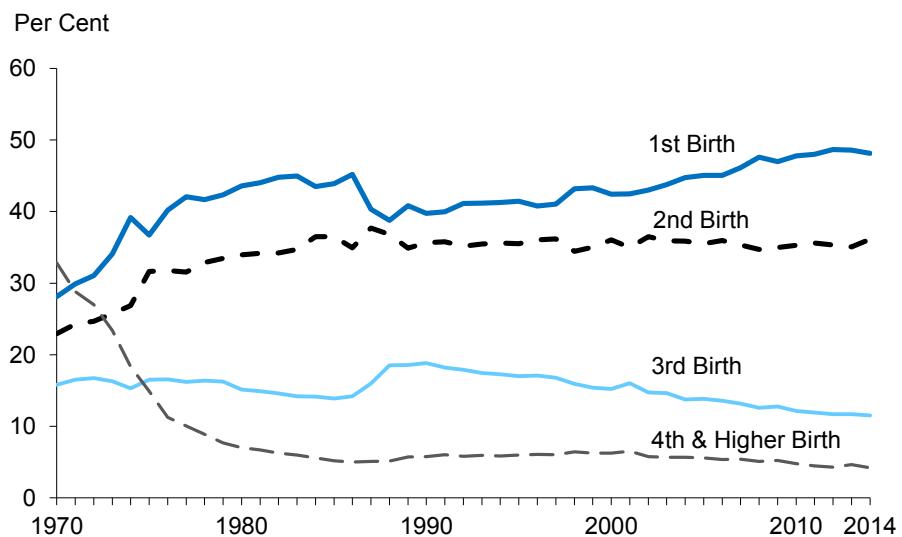

Chart 4.3 Age-Specific Fertility Rate

Births by Birth Order

First order births made up the largest proportion of total live-births in 2014 at 48.1 per cent (Chart 4.4). This was followed by second order births at 36.1 per cent and third order births at 11.5 per cent. Fourth and higher order births constituted the remaining 4.2 per cent in 2014, comparable to the shares since the 1980s.

Chart 4.4 Proportion of Births by Birth Order

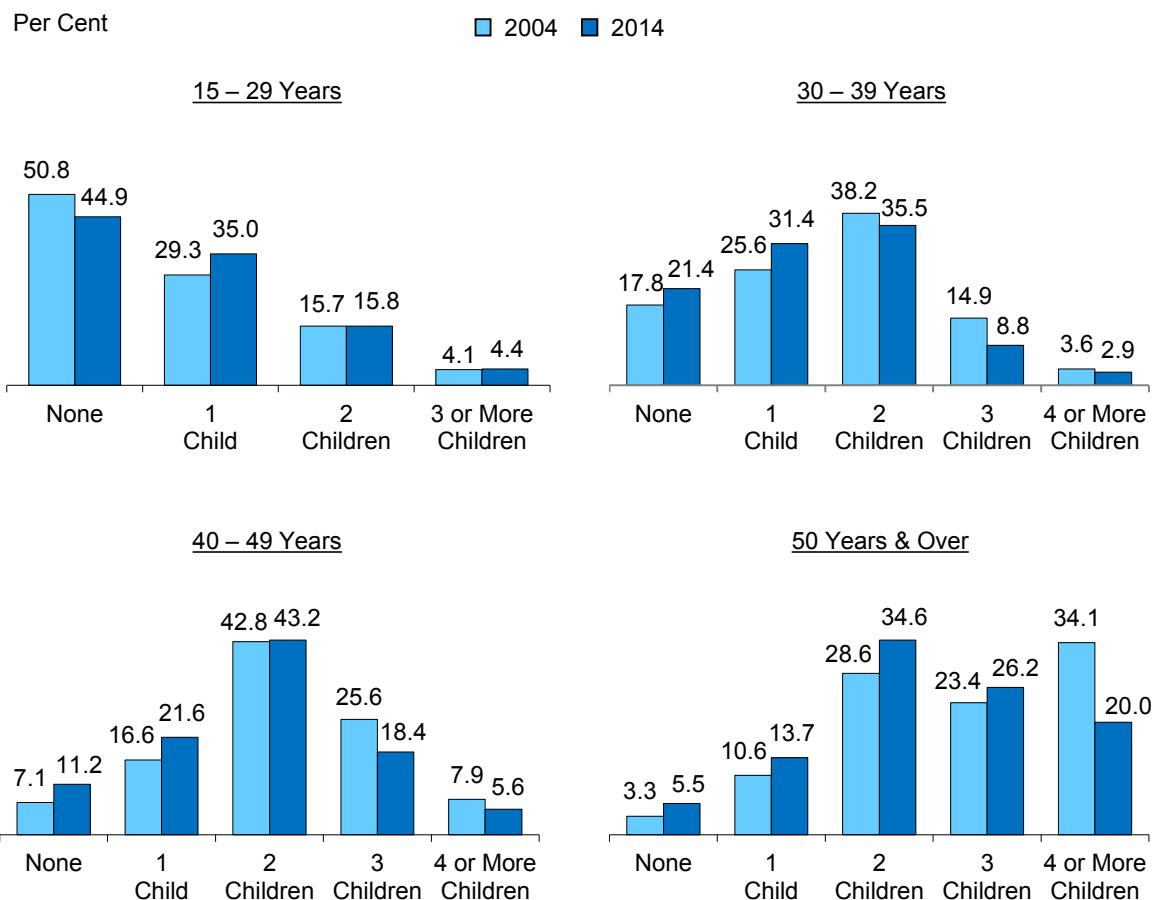

Number of Children Born

Families with two children continued to be the norm among ever-married resident females in their thirties and forties in 2014. Specifically, 35.5 per cent of those aged 30-39 years and 43.2 per cent of those aged 40-49 years had given birth to two children (Chart 4.5).

The proportion of families with no children or only one child is increasing. Among ever-married resident females aged 40-49 years who were likely to have completed child-bearing, those who were childless increased from 7.1 per cent in 2004 to 11.2 per cent in 2014. Likewise, those with only one child increased from 16.6 per cent in 2004 to 21.6 per cent in 2014.

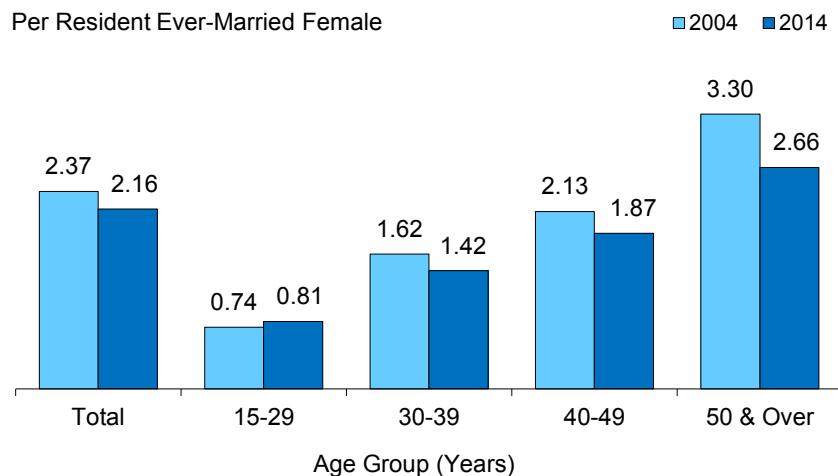

Chart 4.5 Resident Ever-Married Females by Age Group and Number of Children Born

Average Number of Children Born by Age Group of Females

The average number of children born to resident ever-married females aged 40-49 years declined from 2.13 in 2004 to 1.87 in 2014 (Chart 4.6).

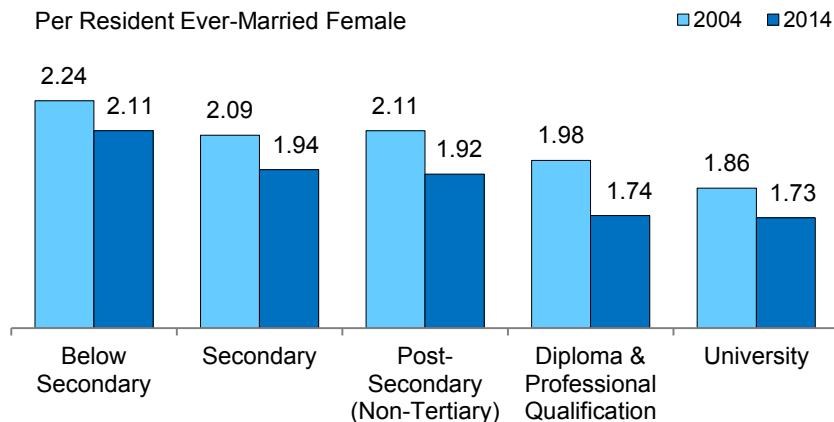

Chart 4.6 Average Number of Children Born by Age Group of Resident Ever-Married Females

Average Number of Children Born by Educational Attainment of Females

The trend of females with higher educational qualifications having fewer children compared to those with lower qualifications continued in 2014 (Chart 4.7).

Chart 4.7 Average Number of Children Born to Resident Ever-Married Females Aged 40-49 Years by Highest Qualification Attained

Note: Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

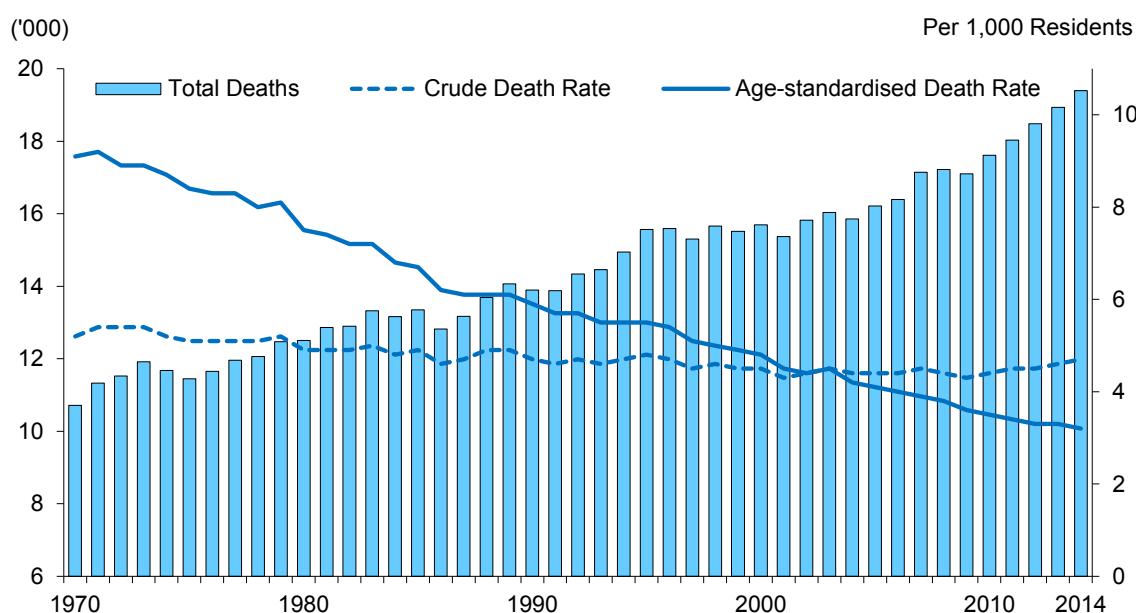

Chapter 5 Mortality

Deaths and Death Rates

In 2014, the number of total deaths continued to rise to 19,393, compared to 18,938 the previous year, reflecting the rapidly ageing population (Chart 5.1). Likewise, the resident crude death rate rose to 4.7 deaths per 1,000 residents in 2014, from 4.6 deaths in 2013.

The resident age-standardised death rate³, which takes the population age structure into account, declined from 3.3 deaths per 1,000 residents in 2013 to 3.2 deaths in 2014. The age-standardised death rate has exhibited a downtrend since 1970, in line with the improvement in health and mortality.

Chart 5.1 Total Deaths, Crude Death Rate and Age-Standardised Death Rate

Note: From 1980 onwards, data on crude death rate and age-standardised death rate pertain to resident population (i.e. Singapore citizens and permanent residents).

Deaths and Death Rates

Statistics on deaths are obtained from records maintained by the Registry of Births and Deaths. The statistics refer to all deaths occurring within Singapore and its territorial waters as registered under the Registration of Births and Deaths Act (Chapter 267), and are compiled based on date of registration.

Crude death rate refers to the number of deaths per thousand population. Age-standardised death rate is another summary indicator of mortality that removes effects of age structure variations in the population over time.

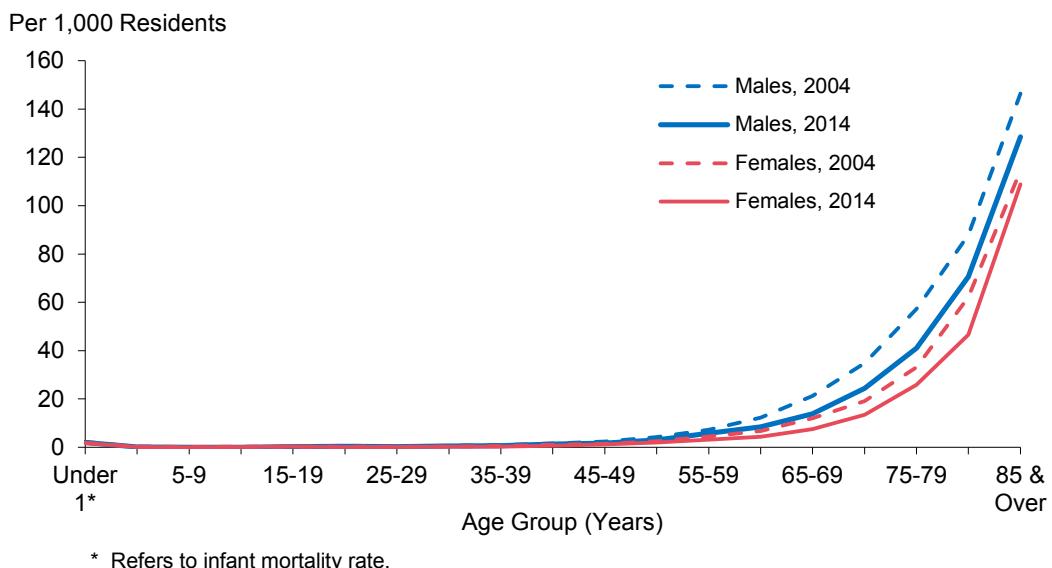

More details on death rates are available in the article "Age-Standardised Death Rate for Singapore" in the Statistics Singapore Newsletter, September 2015.

³ The Singapore resident population as at June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

Age-Specific Death Rate

While the 2014 death rates for resident males and females were similar to those in 2013 for many of the age groups, the 2014 rates were lower for all age groups compared to a decade ago (Chart 5.2). In 2014, females experienced lower death rates than males in nearly all age groups.

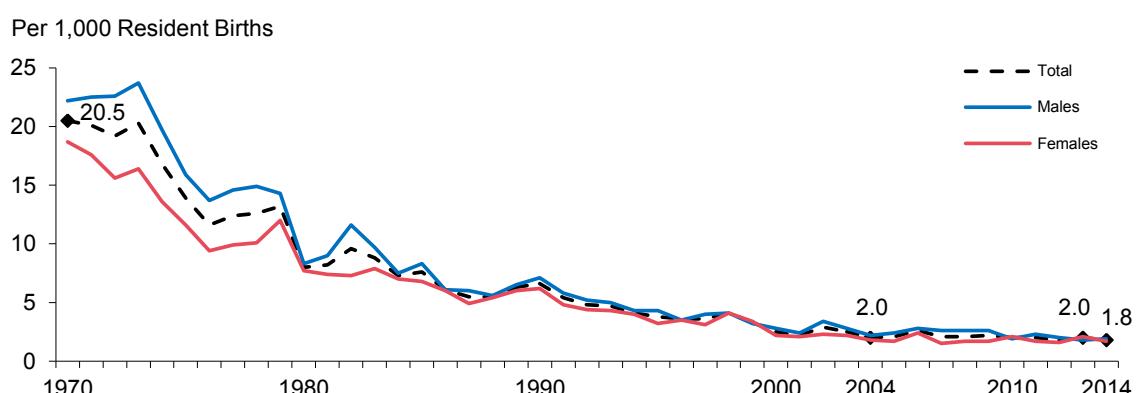

Chart 5.2 Age-Specific Death Rate

Infant Mortality Rate

The infant mortality rate in 2014 was 1.8 infant deaths per 1,000 resident live-births (Chart 5.3). In the last decade, the rate had hovered around 2.0 infant deaths per 1,000 resident live-births.

Chart 5.3 Infant Mortality Rate

Note: From 1980 onwards, data on infant mortality rate pertain to resident population (i.e. Singapore citizens and permanent residents).

Infant Mortality Rate

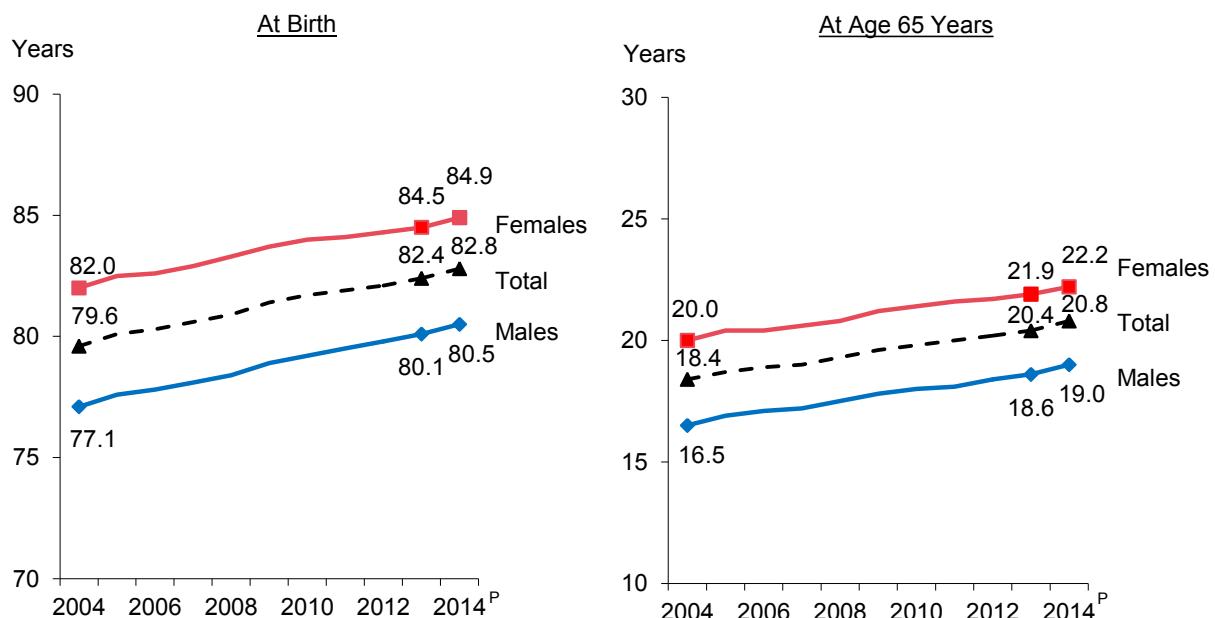

The rate refers to the number of deaths of children under one year of age per thousand live-births. Along with life expectancy, it is one of the most widely used indicators of the population's health status.

Life Expectancy

Life expectancy of Singapore residents continued to rise. The life expectancy at birth in 2014 was 82.8 years, up from 79.6 years in 2004 and 82.4 years in 2013 (Chart 5.4). Life expectancy at age 65 years also increased from 18.4 years in 2004 to 20.4 years in 2013 and 20.8 years in 2014.

Females could expect to live longer. A girl born in 2014 could expect to live an average of 84.9 years, longer than 80.5 years for a boy born in the same year. At age 65 years, females could expect to live another 22.2 years, longer than 19.0 years for males.

Chart 5.4 Life Expectancy of Resident Population

Life Expectancy

It refers to the average number of years which a person (at birth or at a specific age such as age 65 years) could expect to live if the age-specific mortality rates of a given year were held constant over his/her lifetime. It does not take into account future changes in mortality. While it gives an indication of the average longevity of the population, it does not necessarily reflect the longevity of an individual.

This single indicator is commonly used to sum up the mortality experience of a population, taking into account the population's age and sex structure.

More details on life expectancy are available in the publication "Complete Life Tables 2013 – 2014 for Singapore Resident Population".

Note: Data on population from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.

¹ Census of Population

² For 1871-1980, data refer to annualised growth rates over the previous Census year.

³ Prior to 2003, data are based on Singapore's land area as at end-December. From 2003 onwards, data are based on Singapore's land area as at end-June.

⁴ From 1970 onwards, data refer to resident population.

⁵ Based on 1989 and 1990 using *de facto* concept (i.e. the person is present in the country when enumerated at the reference period).

⁶ Based on 2003 unrevised population.

Table A1.2 Old-Age Support Ratio and Age Dependency Ratio, 1947 – 2015

Year	Old-Age Support Ratio ³		Age Dependency Ratio ³			Age Dependency Ratio ³		
	Persons Aged 15-64 Years	Persons Aged 20-64 Years	Persons Aged Under 15 Years and 65 Years & Over	Persons Aged Under 15 Years	Persons Aged 65 Years & Over	Persons Aged Under 20 Years and 65 Years & Over	Persons Aged Under 20 Years	Persons Aged 65 Years & Over

Note: Data on population from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.

¹ Census of Population

² Data exclude persons whose ages are not stated and include Europeans enumerated on Christmas Island and Cocos Islands.

³ From 1970 onwards, data refer to resident population.

Note: Data refer to civil marriages registered under the Women's Charter and Muslim marriages registered under the Administration of Muslim Law Act. Civil marriages which were contracted overseas or under religious and customary rites and were subsequently registered in Singapore in the reference year are excluded.

¹ Total in 2008 includes marriages where the previous marital status of grooms was not reported.

² Prior to 1984, data are based on total marriages. From 1984 onwards, data are based on resident marriages (where either or both the groom and bride are residents).

³ Prior to 1984, data are based on total grooms/brides and total population. From 1984 onwards, data are based on resident grooms/brides and resident population (i.e. Singapore citizens and permanent residents). In view of the rising proportion of marriages among persons aged 45-49 years, the data series on general marriage rate was revised in 2014 to cover the age group 15-49 years.

Table A3.2 Resident Age-Sex Specific Marriage Rate, 1980 – 2014

Year	15 – 19	20 – 24	25 – 29	30 – 34	35 – 39	40 – 44	45 – 49	Per Thousand Unmarried Resident Males
								Males

¹ Refers to births with at least one parent who is a Singapore citizen or permanent resident. Data for 1980–1985 are estimated.

² Refers to the number of daughters a woman would have if she were to experience the age-specific fertility rates prevailing during the reference period, assuming that she survives to the end of her child-bearing years.

³ Refers to the number of daughters a woman would have if she were to experience the age-specific fertility and mortality rates prevailing during the reference period.

Table A4.2 Resident Age-Specific Fertility Rate, 1980 – 2014

Year	15 – 19	20 – 24	25 – 29	30 – 34	35 – 39	40 – 44	Per Thousand Females
							45 – 49

¹ The Singapore resident population as at June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

² Prior to 1990, data refer to total population.

³ Refers to the number of deaths of persons under 28 days of age per thousand live-births.

⁴ Refers to the number of still-births and deaths of persons under 7 days of age per thousand live-births and still-births.

⁵ Refers to the number of maternal deaths (i.e. deaths of mothers) per hundred thousand live-births and still-births.

⁶ Refers to the probability of a new-born baby in a specified reference period dying before reaching the age of 5, if subject to age-specific mortality rates of that reference period. This indicator is derived from a life table and expressed as the number of deaths per thousand live-births.

SINGAPORE DEPARTMENT OF STATISTICS INFORMATION DISSEMINATION SERVICES

Statistics Singapore Website

The *Statistics Singapore Website* was launched by the Singapore Department of Statistics (DOS) in January 1995. Internet users can access the website by connecting to:

<http://www.singstat.gov.sg>

Key Singapore statistics are available via the following sections:

- Statistics
 - which provides access to the latest statistical findings of DOS as well as statistics compiled by Research and Statistics Units (RSUs) in ministries and statutory boards.
- News
 - which provides a listing of the news released by DOS and RSUs.
- Publications
 - which presents the latest editions of DOS' publications, papers and articles.
- Browse by Themes
 - which presents official statistics compiled by DOS and RSUs in the various ministries and statutory boards according to themes. Within each theme, relevant statistics and related press releases, publications and references are provided.

Statistical resources are available via:

- Publication and Papers
 - which lists the latest editions of publications released by DOS according to statistical domains at <http://www.singstat.gov.sg/publications/publications-and-papers>.
All softcopy DOS publications are available for free downloading. Statistical tables of DOS publications in Excel format are also available.
- Advance Release Calendar
 - which provides a six months ahead advance release calendar of key statistical indicators.

The website also provides a convenient gateway to international statistical websites under the "Methodologies & Standards" section:

- Guide to International Statistics
 - which provides hyperlinks to international databases and classifications, as well as websites of international bodies and other national statistical offices.
- IMF Dissemination Standards Bulletin Board
 - which provides metadata about Singapore's key indicators in the real, fiscal, financial and external sectors, including dissemination practices and information about pre-release access of current indicators.

SingStat Express

SingStat Express is a personalised data delivery service which sends the latest press releases, notices of publication, newsletter, occasional and information papers to subscribers via email. SMS alert service is also available to local users. Subscription details are available from the *Statistics Singapore Website* (<http://www.singstat.gov.sg/express>).

SINGAPORE DEPARTMENT OF STATISTICS
INFORMATION DISSEMINATION SERVICES (cont'd)

Really Simple Syndication

Really Simple Syndication (RSS) is an easy way to stay updated on the latest statistical news released via the *Statistics Singapore Website*. The SingStat RSS feed delivers statistical news highlights and hyperlinks to the source documents whenever the updates are posted. More information is available at [http://www.singstat.gov.sg/services/really-simple-syndication-\(rss\)](http://www.singstat.gov.sg/services/really-simple-syndication-(rss)).

SingStat Mobile App

SingStat Mobile App provides users with ready access to the latest key Singapore official statistics through their mobile devices while on the go. Users may visualise data for the latest periods with some 200 charts of commonly used statistics from 25 data categories. The app is available for downloading in iOS and Android devices. More information is available at <http://www.singstat.gov.sg/services/singstat-mobile-app>.

SingStat Table Builder

The SingStat Table Builder contains statistical data series on the Singapore economy and population for users to create customised data tables, plot graphs and charts and export them in different file formats. Explore data trends with the e-service at <http://www.singstat.gov.sg/tablebuilder>.

E-survey

The *E-survey* enables business organisations to complete and submit their survey forms through the internet. Using secured encryption protocols, the *E-survey* ensures that the information transmitted through the net is secured and protected. The system features online helps and validation checks to assist respondents in completing their survey forms. With the *E-survey*, respondents do away with the tedious paper work and manual tasks of mailing or faxing their survey returns to the Department.

Statistical Enquiries and Feedback

If you have any statistical enquiries or comment or suggestions on our statistical publications and electronic services, you are welcomed to:
